BUDGET CALENDAR

DECEMBER

- Finance prepares worksheets, gathers information, and begins development of financial forecast and budgets for following fiscal year including analysis of mid-year operating revenue and expenditures
- Run CIP expenditures and Program Managers to provide updates

JANUARY

- Finance Department prepares Mid-Year Budget Report and CIP update for Council review
- Finance builds preliminary budget information and budget assumptions
- Finance and Program Managers begin discussions regarding Internal Service Funds and Equipment Replacement Fund
- Finance prepares operating budget worksheets for updates, including departmental/program narratives, staffing and financial worksheets, asset and supplemental budget requests.

FEBRUARY

- Finance to prepare budget worksheets for departments, including staffing and internal service program costs
- Departments to prepare draft revenue expenditure workplans and anticipated program updates
- Departments draft prior year accomplishments and goals for upcoming budget cycle
- Project Managers to prepare funding, scope of work, and cost estimates for new CIP proposed projects

MARCH

- Departments turn in proposed budget work plans and supplemental budget requests
- Review proposed budgets with Administrative Services
- Departments and Finance submit changes for Capital Budget
- Project Managers to determine year end CIP project estimates
- City Manager begins to review new proposed CIP projects

APRIL

- Departments to finalize program narratives
- Finance compiles final program narratives, financial and supplemental schedules, and financial budget summaries and charts for City Manager review and discussion
- Project Managers to finalize new project information for CIP submittal
- Public Works Director to bring new projects to Planning Commission meeting for General Plan conformance review and feedback
- Gather feedback from City Commissions on new CIP project requests

MAY

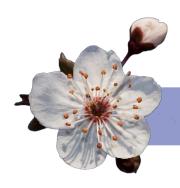

- Final budget briefing with City Manager
- Study Session with City Council for discussion and feedback
- Finance Department to incorporate Council directed changes into proposed budgets and prepare final documents for Public Hearing presentation

JUNE

- City Council revisions incorporated into budget documents
- City Council adoption of Operating Budget(s) and Capital Budget
- City Council adoption of updated User Fee Schedule when applicable
- City Council adoption of Gann Appropriation Limit

JULY - SEPTEMBER

- Finance Department finalizes prior fiscal year revenue and expenditures
- Determine operating budget carryforwards (encumbrances)
- Finalize capital project expenditures and roll-over amounts
- Finalize detail budgets and distribute to City departments
- Prepare final financial and supplemental schedules, charts, and reference materials for budget documents
- Finalize the Adopted Operating & Capital Summary Budget documents
- Post Adopted Operating and Capital Budget document on website
- Submit for Budget Award

BUDGET PROCESS

BUDGET PROCESS OVERVIEW

The City of Los Altos adopts a two year Operating and five-year Capital Plan. The budgets are prepared with detail revenue and expenditure appropriations for the fiscal year beginning July 1st and ending June 30th, and is presented as a summary level budget document. Budget schedules are prepared on the same basis as the City's financial statements, and in accordance with generally accepted accounting principles (GAAP).

BUDGET PURPOSE

The Operating Budget and the Capital Improvement Plan serve as the City's financial plan, as well as a policy document, a communications tool, and an operations guide. Developed with an emphasis on long term financial stewardship, sustainability, service delivery, and program management, a fundamental purpose of these documents is to provide a linkage between the services and projects the City intends to accomplish, and the resources committed to get the work done. The format of the budget facilitates this linkage by clearly identifying program purpose, key projects, and workplan goals, in relation to revenue and expenditures appropriations.

BASIS OF BUDGETING AND ACCOUNTING

Developed on a program basis with fund level authority, the operating budget represents services and functions provided by the City in alignment with the resources allocated during the fiscal year. The Capital Budget is funded and defined by its' approved projects, with ongoing or incomplete projects re-appropriated into the following fiscal year.

Basis of Accounting and Budget refers to the timing factor concept in recognizing transactions. This basis is a key component of the overall financial system because the budget determines the accounting system. For example, if the budget anticipates revenues on a cash basis, the accounting system must record only cash revenues as receipts. If the budget uses an accrual basis, accounting must do likewise. This consistency is also reflected in the City's Comprehensive Annual Financial Report (CAFR), the State Controller's Annual Cities Report, and all other report documents.

Government budgets and accounting uses a mix of accounting methods. A hybrid cash and accrual accounting system known as 'Modified Accrual Basis' recognizes revenues when measurable and available.

The City considers all revenues reported in the governmental funds to be available if the revenues are collected within 45 days after fiscal year-end.

Licenses, property taxes and taxpayer assessed tax revenues (e.g., franchise taxes, sales taxes, and transient occupancy tax) are all considered susceptible to accrual and so are recognized as revenues in the period earned/collected. Revenues from grants and donations are recognized in the fiscal year in which all eligibility requirements have been satisfied.

Expenditures are recorded when the liability is incurred. Claims, judgments, compensated absences, and principal and interest on general long-term debt are recognized as expenditures to the extent they have matured.

The Modified Accrual Basis is used for governmental types of funds, while the full accrual basis accounting method is used for proprietary funds. Governmental Funds consist of the General Fund, Special Revenue Funds, Debt Service Funds, and Capital Project Funds.

Under this basis, revenues are estimated for the period if they are susceptible to accrual, e.g. amounts can be determined and will be collected within the current period. Principal and interest on general long-term debt are budgeted as expenditures when due, whereas other expenditures are budgeted for liabilities expected to be incurred during the current period.

Proprietary fund budgets are adopted using the full accrual basis of accounting whereby revenue budget projections are developed recognizing revenues expected to be earned during the period, and expenditures are developed for expenses anticipated to be incurred in the fiscal year.

While not commonly used in Los Altos, Fiduciary Funds are also budgeted using the modified accrual basis. This includes Trust Funds, which are subject to trust agreement guidelines, and Agency Funds, which are held in a custodial capacity involving only the receipt, temporary investment, and remittance of resources.

SUMMARY OF BUDGET DEVELOPMENT

The City develops its budgets in collaboration with departments and department heads as a team. The City Manager and Administrative Services Director guides the process through budget development; however program budgets and workplans are developed with each department's director and program manager's oversight and expertise. This approach allows for hands-on planning and creates a clear understanding for both management and staff of a program's goals and functions to be accomplished in the next budget year.

THE DEVELOPMENT PROCESS

Typically, both the Operating and Capital Budget and Capital Improvement Plan (CIP) annual development processes begin in late December / early January as the City Manager works with the City Council to develop and refine goals and directives for the upcoming budget year. The CIP is also reviewed during this time to determine funding capabilities, project priorities, and to refine project workplans. Although the CIP Budget is a stand-alone body of work, CIP projects impact the City's ongoing operations and are therefore incorporated into the Operating and Capital Summary Budget document through the resulting financial appropriations and service level requirements.

Budget assumptions, directives and initiatives are provided to set the City's overall objectives and goals. From January through April, staff identifies and analyzes program revenue and expenditure projections in coordination with Finance staff and City management. Capital improvement projects are assessed and refined, and CIP funding and appropriation requirements are finalized.

Through rounds of budget meetings and revisions, operational and capital workplans are reviewed and compiled, and staff finalizes the proposed program and capital budgets. Financial summary information is finalized, and the proposed budget document is produced for City Manager and City

Council review. Finally, a summary level Public Hearing presentation is prepared to highlight the notable budget impacts in the forthcoming year.

BUDGET ADOPTION

The City Council reviews the proposed two-year Operating and five-year Capital Improvement Plan in a public hearing at the Council meeting in late-May as a study session. Notice of the hearing is published prior to the Council's public hearing date.

The public is invited to participate and summaries of the proposed budgets are available for review on the City's website, in the City Manager's office and at the budget hearing. Under requirements established in Section 65401 of the State Government Code, the City's Planning Commission (and other City Commissions) also reviews the proposed Capital Improvement Plan and reports back to the City Council as to the conformity of the plan with the City's Adopted General Plan.

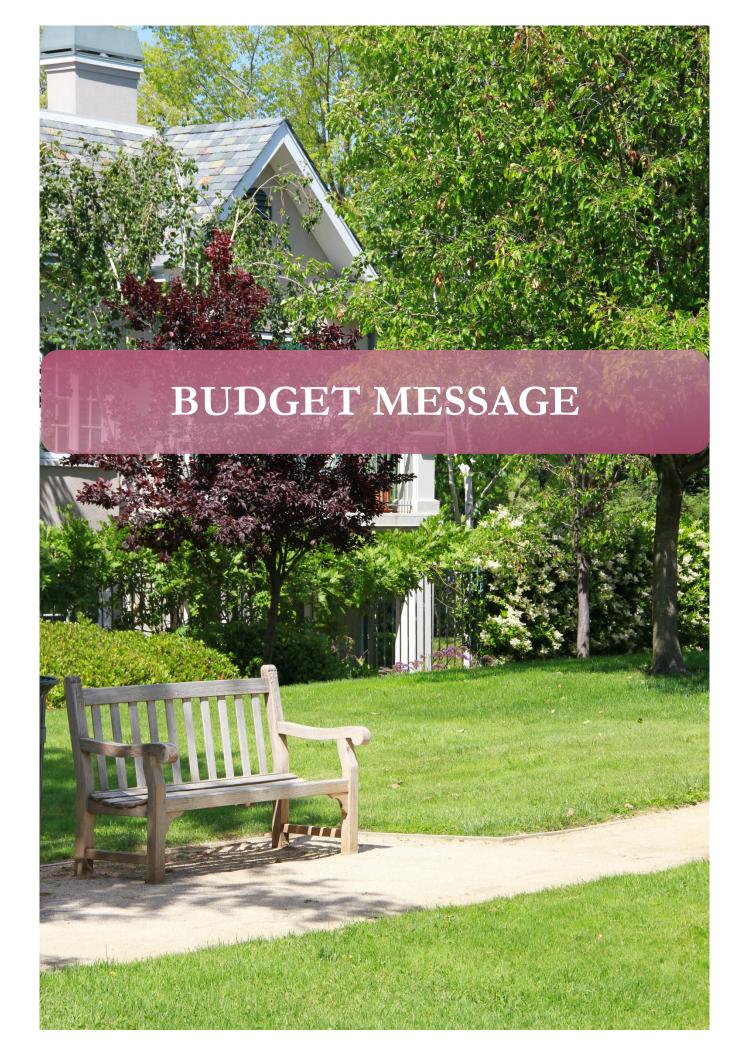

Final council-directed revisions to the proposed budget are made and the budget documents are resubmitted to the Council for adoption, again in a publicized public hearing prior to the beginning of the fiscal year, typically in late June.

The City of Los Altos City Code requires the City Manager to prepare and submit an annual budget to the City Council. This is accomplished in June, when the final proposed budget is formally submitted to the Council in the subsequent public hearing. The approved resolutions to adopt the CIP and operating budgets and the appropriation limitation (Gann Limit) follow later in this section.

BUDGET AMENDMENTS

During the course of the fiscal year, financial and workplan changes or unanticipated needs may necessitate adjustments to the adopted budgets. The City Manager is authorized to transfer appropriations between categories, departments, projects, and programs within a fund in the changes to capital projects in the Capital Budget.adopted Operating Budget, whereas the City Council holds the authority for Operating Budget appropriation increases and decreases, and transfers between funds, and for both scope and funding.

BUDGET MESSAGE

DATE: June 13, 2017

TO: City Council

FROM: Chris Jordan, City Manager

SUBJECT: Budget Message for Proposed Two-Year FY18-19 Operating Budget and 5-Year

FY2018-22 Capital Improvement Plan (CIP)

Dear Mayor Mary Prochnow and the Members of the Los Altos City Council:

The greater danger for most of us lies not in setting our aim too high and falling short; but in setting our aim too low, and achieving our mark. Michelangelo

In 2018, the City of Los Altos will turn 66 years old. But rather than contemplating a life of leisurely retirement, the City of Los Altos is opening a window of opportunity. During and following the Great Recession, Los Altos strategically placed itself in a position to take advantage of the positive economic environment we now enjoy. Through conservative spending practices and early payments to reduce liabilities, the City has a positive cash flow and an ever-strengthening financial reserve. We now find ourselves able to complete projects that our predecessors planned for, but previously found the timing wasn't right for.

Now, in 2017, we have the opportunity to assist in the evolution of our beautiful community. Yes, there are challenges. Would some argue we are aiming too high? Perhaps, but aiming high is what has made the Silicon Valley so successful. By making steady progress towards accomplishing lofty goals over the next several years, we will greatly enhance the community experience for our citizens.

The Proposed FY 2018-2019, 2-year Budget starts the process of fully funding deferred maintenance of the City's infrastructure and facilities while also planning for future improvements and enhancing the look of the community. The Budget also funds all the City Council's Strategic Priorities without adding any permanent staff positions who could add to the City's future liabilities.

Revenues

The City's largest source of revenues, property taxes, continues to increase at a rate sufficient to maintain City operations and provide funding for needed capital projects. For FY 2018, the Proposed Budget anticipates an increase in property taxes of \$957,000, or 5%. This increase is slightly less than the increases we have witnessed in recent years, and is significantly less than many cities in Santa Clara County. We also expect a similar 5% increase in FY 2019.

The news, however, is not as positive for all our other revenue sources. Sales tax revenues are essentially stagnant as are transient occupancy tax revenues. Community Development fees are slightly lower than in previous years due to a relative lack of large development projects due, in part, to the two moratoria currently in place. Revenues from recreation fees remain the same as in previous years, but we may see a modest decrease in a few years during the construction of a new Hillview Community Center. We would anticipate an uptick in revenues when the new center is opened.

In total, the City's anticipated revenues across all funds, is \$47.96 million (\$38.5 million in the General Fund). Although we continue to be optimistic about future revenue growth, our increases are almost entirely based on the resale of single family homes. It would be advantageous if our growth was across many revenue streams leaving us less vulnerable to changes in the residential real estate market.

Operating Expenditures

General Fund operating expenditures are estimated to climb to just over \$36.3 million in FY 2018, an increase of 2% over the Budgeted amount for FY 2017. The lower than anticipated increase is primarily due to the current number of vacant positions. To account for this, the Proposed Budget estimates a savings equal to a vacancy rate of 5%. For FY 2019, the Proposed Budget estimates just a 2% vacancy factor causing the operations budget to climb by approximately 4.7%.

Another anticipated increase is for payments on behalf of retirees to CalPERS. Although CalPERS has not provided cities with new rates, due to the decision to lower the discount rate, we are anticipating future increases. For many public agencies, these increases may prove devastating. Fortunately for Los Altos, decisions made a few years ago to pay off part of the City's liability, and the decision this year to reserve additional funds for future increases, allows us to continue our current operations and fund a robust capital improvement plan without fear of a catastrophic increase in payments to CalPERS.

The Proposed Budget anticipates a total of \$55.5 million in expenditures in FY 2018.

Funding the City Council's Strategic Priorities

A significant portion of any City budget funds the continuing operation of the City – from public safety to maintenance of the City's infrastructure to planning and administration. After funding these operations, the City Council's adopted Strategic Priorities are the most critical projects to be funded. Below is how each is described in the Proposed Budget:

1) **Downtown**: The City will develop a vision document for the downtown that balances vibrancy/vitality with a village character. As a first step, the City Council will receive a Downtown Vision report that will include a 3-dimensional model for the preferred scenario.

In the Proposed Budget: Adequate funding for the vision report is in the Community Development Department under professional services. In addition, based on the approval of the City Council in February, the City has added a Senior Planner to assist with this project and other initiatives.

2) Complete the Improvements to the City's Land Use Regulations for Loyola Corners and El Camino Real

In the Proposed Budget: Adequate funding and staffing for these projects is in the Community Development Department.

3) **Hillview Community Center:** By December 2020, the City will have completed a new/refurbished community center at Hillview.

In the Proposed Budget: The Capital Improvement Plan includes a total of \$25 million over 3 years (\$3 million in FY 2018) to fund this project. In February, the City Council approved the hiring of a Project Manager in Public Works to assist with the implementation of this project.

4) Create and Maintain a 10-year Capital Facilities Plan

In the Proposed Budget: Adequate funding for this project is in the Administrative Services Department. The prior budget also included the reclassification of a Management Analyst position to Senior Accountant to assist with the continued development and maintenance of this plan and strengthen our financial analysis and integrity.

5) **Housing/Land Use:** The City Council wants to proactively review opportunities to expand affordable housing in Los Altos.

In the Proposed Budget: Funding/staffing for this project is in the Community Development Department. Should the City Council wish to impose an Affordable Housing fee on some or all new construction, a supplemental budget may be necessary to appropriate any revenues received.

- 6) **Traffic Safety:** The City will take steps to improve traffic/pedestrian and bicycle safety throughout the City with a focus on safe routes to schools

 In the Proposed Budget: The Capital Improvement Plan includes funding for 10 Safe Routes to School projects in FY 2018, totaling \$840,000.
- 7) **Community Engagement:** The City Council will engage with the community and improve citizen access to City information.

In the Proposed Budget: The Budget includes adequate funding for continuing to advertise all City Council agendas in the Town Crier (in the Executive Department); a refresh of the City's website that will provide for better access to City information online; and for the printing and distribution of a Popular Annual Financial Report, a user-friendly review of the City's financial situation.

Personnel

The City's staffing level is proposed to remain at the current authorized level of 133 Full-time Equivalent positions (FTE). This accounts for two positions that were approved earlier in 2017 – a Project Manager for Public Works to assist in overseeing major facility projects; and a Senior Planner in Community Development for managing major long term planning initiatives. We are also including funds for two limited-term management fellow positions in the operating budget. These positions are part of a continuing effort by cities and counties on the peninsula to attract recent graduate school graduates to this area to begin their government career. Local government agencies have recognized that we need to attract individuals early in their careers because it is extremely difficult to recruit from other parts of the state or nation.

The Proposed Budget estimates compensation and benefit expenses. Two of the City's collective bargaining units – the Los Altos Peace Officers Association and the Los Altos Municipal Employees Association – are concluding negotiations with management. The estimates in the Proposed Budget should not be significantly different than the final agreements.

Public Safety

By far the largest portion of the General Fund Operating Budget is dedicated to Public Safety. The Public Safety budget, split between the contract with Santa Clara County for fire services and our own police Department, totals over \$17.4 million in FY 2018.

In 2016, the City's negotiating team lead by Assistant City Manager J Logan, successfully negotiated a new 10-year agreement with Santa Clara County Fire Department that will sustain the current level of fire and emergency medical services at a cost that will not increase by greater than 5% from any one year to the next. With the increase in personnel expenses caused not just by salaries, but mostly by medical and retirement benefit increases, this marks a major victory for the City. Given that the City has now been contracting with the County for fire services for 20 years, the Council may wish

to consider the advantages and challenges of annexing in to the County fire district and remove this item permanently from the City's budget.

The Los Altos Police Department continues its fine work in protecting the public. Research recently completed by the website Neighborhoodscout.com concluded that Los Altos was the 6th safest city in California and 98th in the nation (for cities with population of over 25,000). In 2016, the City Council authorized one additional traffic officer position and as we look to complete our recruiting process for this and other positions, we are not recommending additional positions at this time. However, the Proposed Budget does include three replacement vehicles in FY18 and three replacement vehicles in FY19 to ensure that our police equipment remains safe and functioning.

The Proposed Budget also includes adequate funds to continue the City's partnerships with the Los Altos School District and Cupertino Union School District to fund crossing guards at critical intersections around the City. The Proposed Budget includes a projected 20% increase in the cost to the City of providing these services – totaling approximately \$220,000 in FY 2018. The schools provide an additional \$50,000 to complete the cost for these services.

Finally, the Public Safety proposal also includes \$15,000 for the City to provide a grant to WomenSV. WomenSV has been a partner of the Los Altos Police Department, assisting the Department with domestic violence education, prevention, intervention and victim care.

Other Departments

The remaining departments (Community Development, Administrative Services, Recreation and Community Services, Public Works and Executive/Legislative) are essentially current services budgets with a few initiatives including:

- 1) In Public Works, the Proposed Budget includes \$80,000 annually for additional City Beautification and the creation of community gardens at the Woodland Library and at Grant Park. During the drought, the City rightfully took a very cautious approach to enhancing the City's landscaping. Now, with the drought in the rearview mirror, we want to restore our landscaping while being mindful of the importance of water conservation as a way of life.
 - Also included is \$150,000 for large tree maintenance. The City is in the process of completing a city-wide tree assessment and these funds will be used to provide enhanced tree maintenance efforts, with some funds specifically dedicated to Redwood Grove.
- 2) For Economic Development, we have included a total of \$30,000 in funding for several initiatives:
 - a. A pilot rideshare program. Working with a rideshare partner, we will target certain demographics in the community and provide subsidized rides to allow all our citizens

- the opportunity to enjoy all aspects of our community, particularly the downtown and community activities.
- b. A pilot bike share program that will include the purchase of a few bikes to use for City business around town. If successful it could be expanded for use by residents.
- c. Outdoor furniture update/replacement. To enhance gathering spaces in the downtown and other commercial areas, the Proposed Budget includes funding for replacement furniture.

\$25,000 is included to continue one of our primary community events – the Downtown Green – which will occupy part of Third Street during July and August.

- 3) The Administrative Services Department will be at the forefront of our effort to modernize the City's technology. The Information Technology Initiatives project in the Capital Improvement Plan will include a Financial Enterprise Resource Platform (ERP) that will upgrade our financial software and create a more user-friendly system that should also allow us to share financial information more completely and expeditiously with the public and with other department systems.
 - Funding has also been included for the Human Resources Division to address one of our biggest challenges the recruitment and retention of outstanding staff. As the cost of housing increases in the region and the toll of commuting wears on our staff, we continue to endure significant staff turnover. We then face the constant challenge to replace our staff with equal or better municipal professionals. We have tasked the HR Division with identifying ways to adapt our workplace culture to make the City of Los Altos an attractive employer for all generations, including the formation of our Workplace Innovation Team (WIT).
- 4) In Community Development, the Proposed Budget includes adequate funding for the recently approved contract for the new uniform electronic permitting system for Community Development, Finance, Public Works and Code Enforcement, that will significantly expand the City's online services, and provide staff with additional tools to manage workflow and improve the processing of applications and issuance of permits.

Capital Improvement Plan

Through the recession and the last several years, this City has taken steps to solidify its financial position – from paying down CalPERS liability to conservatively saving money for a future economic downturn. All this preparation leads us to this moment in time when we can reinvestment the community's tax dollars into our infrastructure and facilities. In 2016, the City conducted a series of facility assessments that indicated that we have deferred maintenance totaling millions of dollars. Our roads have also deteriorated from a pavement condition index (PCI) of 86 (out of 100) in 2001 to just 71 in 2016. It is time to stop deferring and start investing!

The Capital Improvement Plan may be the most ambitious this City has ever undertaken: \$67.7 million over the next 5 years, and nearly \$94 million when we include prior year appropriations. The breakdown by type of project is:

Category	Budget (in 000's of dollars)
Sewer	19,968
Pedestrian and Bicycle	13,399
Streets and Roads	15,420
Storm Drain System	1,900
Technology	4,336
Community Development Department	1,523
Buildings	34,780
Parks and Trails	1,911
Equipment Replacement	578
Total	\$93,815

Some of the highlights include:

Streets

The degradation of the street system needs to stop. As streets deteriorate, the maintenance cost increases exponentially. Our goal is to stop the degradation and turn the corner so that the PCI of the street system begins to slowly climb again – up to 75 within 10 years. To make this happen, the Proposed Capital Improvement Plan totals \$2 million each year for the next five years for road maintenance. The good news is that during these five years, our road system becomes less reliant on the City's General Fund for maintenance. With the passage of Measure B and the increase in state funding from an increase in the gas tax and the Road Maintenance and Accountability Act, we anticipate only spending \$1.6 million from the General Fund over the next five years (\$600,000 in FY 2018).

The CIP also includes an ambitious schedule for safety enhancements in the City's transportation system. Ten Safe Routes to Schools projects are planned for FY 2018, and several more in the future years. A combination of Measure B funds and City funds will be used to upgrade the area of Foothills Expressway at the San Antonio and El Monte intersections. The CIP also includes funds for rehabilitating the pedestrian bridge on Fremont Avenue, and making major improvements to the pathway on Miramonte Avenue over the next few years.

City Facilities

The highlight of the CIP is a project that is possibly the most expensive and anticipated undertaking in the history of the City: the new Hillview Community Center. This project, estimated to cost \$25 million, will, when completed, have a profound impact on the culture of the City. It will become the

City's family room – the place where the community goes to gather and engage each other. It will give the City its heart.

For the City to simply remove the backlog of deferred maintenance at the remainder of our facilities requires a minimum of approximately \$700,000 annually. But we don't believe that is good enough; the Los Altos community deserves better. The CIP includes \$1.2 million annually for facility maintenance and improvements. These funds will be used to create a more functional City Hall and Police station; remodel the Garden House at Shoup Park and improve the Los Altos Youth Center. In addition, we plan to complete the scheduled improvements to the Grant Park Community Center which total \$475,000 from prior year appropriations.

The City's Financial Commission has proposed an even bolder approach: front load this spending because our dollars lose buying power every year that passes. As we develop plans for these facilities, staff may return to the City Council to discuss taking the recommendation of the Financial Commission and completing some of the larger projects early in the five-year window.

Parks and Trails

The CIP also allocates nearly \$2 million for park projects. These funds will be prioritized annually with the assistance of the Parks and Recreation Commission and will be used for major maintenance or small upgrades to the parks. Funds for these projects primarily come from the City's Park-in-lieu revenues.

As the CIP is implemented over the next five years, the community will see a significant change in the City which will be safer, more functional and more aesthetically pleasing than it is today. We want the community to take pride in our facilities and know that the City believes Los Altos should have the very best.

Enterprise Funds

The City has two Enterprise Funds – Sanitary Sewer and Solid Waste. Both Funds currently have significant reserves that over the next several years we will be working to reduce by investing in infrastructure. The Sanitary Sewer Fund begins this budget cycle with a reserve of \$7.4 million. Over the next two years, with a robust capital improvement program, we expect to reduce that reserve by \$2 million.

The Solid Waste Fund's reserve has grown to almost \$3.7 million and is projected to add \$600,000 to that reserve over the next two years. Staff has been reviewing the possibility of utilizing some of these funds for street maintenance to offset the damage caused by the solid waste trucks. Staff will bring to the Council any necessary adjustments to this budget if this is feasible.

Other Special Revenue Funds

The City has several other special revenue funds which collectively have a beginning fund balance of over \$6.3 million. The Proposed Budget begins to reduce the largest of these – the Park-in-lieu Fund – by actively pursuing improvements to the City's park system. Staff also plans to continue to identify projects that could be funded through these Special Revenue Funds in an effort to reinvest available balances in the community rather than allowing these reserves to continue to increase.

Reserves

In total, the Proposed Budget identifies \$68.2 million in beginning fund balances July 1, 2017. We anticipate an ending fund balance of \$63.6 million at the end of the fiscal year. It is our expectation that the reserve balance will continue to decrease each year over the next decade as we re-invest in our streets, parks, and community facilities.

Conclusion

"Success is where preparation and opportunity meet." Bobby Unser

This Budget Message began by discussing our goals and our attempt to aim high. And we are not alone in seeing this as the opportunity that this community has long awaited. On May 3, 2017, in its weekly editorial, the Los Altos Town Crier asked the question: "Is this a renaissance?" Despite the challenge of facing extreme population growth throughout the region, the editorial pointed to a confluence of various public and private projects and plans to discuss the fact that the community has an opportunity rarely seen. The editorial finished with:

"We must respond to that growth to maintain and – ideally – improve our quality of life. Doing nothing is not an option."

We believe the opportunity exists in this community right now. The decisions that have been made, and the challenges that have been overcome over the past several years, have prepared us for this time and place. With the two-year FY 2018-19 Proposed Budget, we take the next steps in the evolution of Los Altos. And we expect the community to be a better place for these actions.

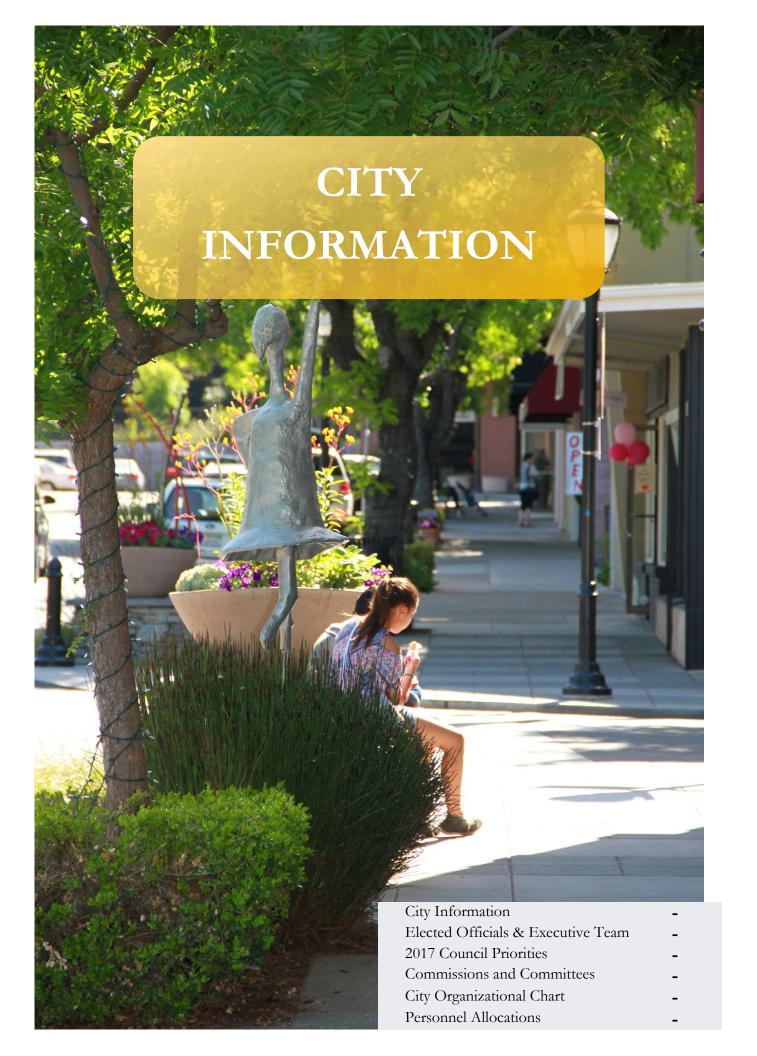

I'd like to acknowledge the tremendous work of our Department Directors for not only their assistance in the preparation of the Proposed Budget, but their willingness to think boldly and set a new vision for what is achievable.

A special thanks to the Administrative Services Director Sharif Etman and Financial Services Manager Sarina Revillar and Angela Goldberg for their efforts in preparing this document. And, finally, a special acknowledgment to the Los Altos City Council who have set this course and made it clear that now is the time to move this agency, and the community, forward.

Respectfully submitted,

Chris Jordan City Manager

CITY INFORMATION

Location

Los Altos, incorporated as a general law city in December of 1952, is located 37 miles south of San Francisco. Los Altos covers 7 square miles and is bordered by Los Altos Hills, Palo Alto, Mountain View, Sunnyvale and Cupertino.

Los Altos City Hall

1 North San Antonio Road Phone: (650) 947-2700 Fax: (650) 947-2701

administration@losaltosca.gov

www.losaltosca.gov

The City of Los Altos, is seven square miles with seven distinct commercial areas and is home to approximately 30,000 people. The city incorporated to preserve the rural atmosphere and small town feel and to prevent annexation from neighboring cities. The commercial districts are bustling neighborhood retail areas, characterized by tree-lined streets and a village atmosphere. Los Altos will celebrate its 65th anniversary in 2017 and since 1952 has successfully preserved its rural roots, maintained spacious lot sizes for single-family homes and established policies for commercial development.

The City of Los Altos operates as a Council-Manager form of government. Council Members are elected at-large to four-year terms and are responsible for determining City policies and service standards. The City Council in turn appoints the City Manager, to oversee the daily operation of the city organization.

2017 COUNCIL PRIORITIES

DOWNTOWN

The City will develop a plan for downtown that balances vibrancy with a village character. As a first step, the City Council will receive a Downtown Vision report that will include a 3-dimensional model for the preferred scenario

Complete the Improvements to the City's Land Use Regulations for Loyola Corners and El Camino Real

- 1. A new Loyola Corners Specific Plan will be adopted by July 2017
- 2. Adopt new regulations for development along El Camino Real

HILLVIEW COMMUNITY CENTER

By December 2020, the City will have a new/refurbished community center at Hillview

Create and Maintain a 10-year Capital Facilities Plan

Over the next four years, the City Council commits to reinvesting in community infrastructure and facilities. To better inform these decisions, the City will create and maintain a 10-year plan that includes resources and expenses for the improvement and maintenance of city facilities and infrastructure that will improve pride in the community's assets

HOUSING / LAND USE

The City Council wants to proactively review opportunities to expand affordable housing in Los Altos

TRAFFIC SAFETY

The City will take steps to improve traffic/pedestrian and bicycle safety throughout the City with a specific focus on safe routes to schools

COMMUNITY ENGAGEMENT

The City Council will engage with the community and improve citizen access to City information

BICYCLE & PEDESTRIAN ADVISORY COMMISSION

	Term	Term Expiration
Suzanne Ambiel	1 st	March 2020
Wesley Brinsfield	1 st	March 2020
Jerome Chester	1 st	March 2020
Jim Fenton	$2^{\rm nd}$	March 2018
Steve Hindman	Partial	March 2018
Randy Kriegh	1 st	March 2020
Nadim Maluf	Partial	March 2018

Staff Liaison: Susanna Chan (Public Works)

DESIGN REVIEW COMMISSION

	Term	Term Expiration
Alexander Glew	1 st	September 2020
Samuel Harding	1 st	September 2020
Jude Kirik	1 st	September 2018
Tracey Moison	1 st	September 2018
Sepideh Zoufonoun	1^{st}	September 2020

Staff Liaison: Zach Dahl (Planning)

ENVIRONMENTAL COMMISSION

	Term	Term Expiration
Don Bray	2 nd	March 2020
Joseph Eyre	1^{st}	March 2018
Heather Halkola	1^{st}	March 2020
Gary Hedden	1^{st}	March 2018
Laura Teksler	1^{st}	March 2020
Don Weiden	Partial	March 2018
Lei Yuan	1^{st}	March 2018

Staff Liaison: J. Logan (Executive)

FINANCIAL COMMISSION

	Term	Term Expiration
David Byrne	$2^{\rm nd}$	September 2017
Gary Kalbach	Partial	September 2017
Kuljeet Kalkat	1 st	September 2019
David Marek	1 st	September 2019
James Martin	1 st	September 2019
Martha McClatchie	1 st	September 2019
Amy Pearl	1 st	September 2017

Staff Liaison: Sharif Etman (Administrative Services)

HISTORICAL COMMISSION

	Term	Term Expiration
Janis Ahmadjian-Baer	2^{nd}	September 2018
Qing Bai	$1^{\rm st}$	September 2020
Russell Bartlett	$1^{\rm st}$	September 2020
Walter Chapman	$2^{\rm nd}$	September 2018
Margo Horn	1^{st}	September 2018
Larry Lang	$1^{\rm st}$	September 2020
Nomi Trapnell	1^{st}	September 2018

Staff Liaison: Sean Gallegos (Planning)

LIBRARY COMMISSION

	Term	Term Expiration
Mukesh Agarwal	1 st	September 2019
Ibrahim Bashir	Partial	September 2017
Rebecca Colman (LAH)	1 st	August 2020
Cindy Hill	$2^{\rm nd}$	September 2019
Garo Kiremidjian (LAH)	1 st	August 2020
Richard Liu	Partial	September 2017
Judie Suelzle	$2^{\rm nd}$	September 2017

Staff Liaison: Jaime Chew (Recreation)

PARKS & RECREATION COMMISSION

	Term	Term Expiration
Michael Ellerin	1 st	March 2021
Neysa Fligor	1 st	March 2019
Tanya Lindermeier	$1^{\rm st}$	March 2021
Pradeep Parmar	$2^{\rm nd}$	March 2019
Jonathan Weinberg	1^{st}	March 2021

^{*}Two vacant seats, one with an unexpired term ending March 2019, the other with a full term ending March 2021.

Staff Liaison: Manny Hernandez (Recreation)

PLANNING & TRANSPORTATION COMMISSION

	Term	Term Expiration
Ronit Bodner	1^{st}	September 2018
Phoebe Bressack	2^{nd}	September 2020
Anita Enander	Partial	September 2018
Sally Meadows	1^{st}	September 2020
Michael McTighe	1^{st}	September 2018
Bahi Oreizy	1^{st}	September 2020
Alexander Samek	1^{st}	September 2020

Staff Liaison: David Kornfield (Planning)

PUBLIC ARTS COMMISSION

	Term	Term Expiration
Nancy Bremeau	Partial	September 2017
Doug Edwards	1^{st}	September 2019
Nancy Ellickson	1^{st}	September 2017
Maddy McBirney	$2^{\rm nd}$	September 2019
Paula Rini	1^{st}	September 2017
Monica Waldman	1^{st}	September 2019
Karen Zucker	1^{st}	September 2017

Staff Liaison: Jon Maginot (Executive)

SENIOR COMMISSION

	Term	Term Expiration
Janet Harding	1 st	March 2018
Tracie Murray	1^{st}	March 2018
Doris Hawks Torbeck	2^{nd}	March 2019
Bert Vincent	2^{nd}	March 2019
Jim Basiji (LAH)	$1^{\rm st}$	March 2019
Karen Lemes (LAH)	Partial	March 2017

*One vacant seat with an unexpired term ending in March 2018. Staff Liaison: Jaime Chew (Recreation)

YOUTH COMMISSION

	Term	Term Expiration
Vikram Bharati	$2^{\rm nd}$	June 2018
Nesyah Galatin	1 st	June 2019
Krish Gujral	$1^{\rm st}$	June 2018
Drishaan Jain	$2^{\rm nd}$	June 2018
Mahi Kolla	$1^{\rm st}$	June 2018
Brianna McKean	$1^{\rm st}$	June 2019
Medha Rajagopalan	$1^{\rm st}$	June 2018
Anooshka Shetty	$2^{\rm nd}$	June 2019
Vignesh Suresh	$2^{\rm nd}$	June 2018
Wilson Xu	1 st	June 2018
Rebecca Zhu	1 st	June 2018

Staff Liaison: Zack Silva (Recreation)

Noteworthy Items of FY18 & FY19 Budget

- Approved a \$25M budget for Hillview Community Center
- Transferred Commissioner Training Budget to Legislative from Non-Departmental
- Continued support of Community Promotion and Outreach Events

FY18 & FY19 Goals

- Create a 10-year Capital Facilities Plan to address aging infrastructure and facilities
- Develop a Downtown Plan
- Improve traffic/pedestrian and bicycle safety throughout the City
- Adopt Land Use Regulations for Loyola Corners and El Camino Real

The City Council serves as the elected body representing the residents of Los Altos. The City Council is responsible for determining City policies and service standards. Adoption of the two-year Financial Plan by Council allocates the City's financial and human resources to support its goals and objectives for the two-year cycle. The City's Municipal Code and General Plan are also adopted and amended by Council action.

FY16 & FY17 Highlights

- Approved a new 10-year contract with Santa Clara County Fire
- Initiated a Downtown Visioning Process
- Recruited and hired a new City Manager and City Attorney
- Initiated a new Loyola Corners Specific Plan
- Began holding Open Office Hours with members of the City Council

Did You Know?

- There are 52.5 acres of City parkland.
- Since its incorporation in 1952, Los Altos has had 42 mayors.

The Executive function of the City includes six program areas: City Manager, City Attorney, City Clerk, Public Information, Economic Development, and Risk Management. The City Manager also ensures the delivery of City services in an efficient and effective manner.

The City Attorney represents the City in all legal matters and coordinates closely with staff in addressing the City's exposure liability. The City Attorney drafts necessary legal documents, ordinances, resolutions, contracts and other documents pertaining to the City's business.

The City Clerk is responsible for facilitating the conduct of business by the City Council and City Commissions and Committees, and fulfilling legal requirements as set forth in the City Code and State law. The Clerk conducts all elections and serves as Official Custodian of all City records.

The Public Information program is responsible for disseminating information to the public through a variety of means including the City's website and social media channels. The Public Information program assists all City departments in communicating information and responding to inquiries in an easy-to-access and understandable manner.

The Economic Development program serves as a liaison between businesses, commercial districts and the City government providing support and assistance

to both existing businesses, commercial districts and the City government providing support and assistance to both existing businesses and prospective businesses looking to locate within the City of Los Altos.

The Risk Management program strives to provide a safe environment for City residents, visitors, and employees, as well as to preserve and protect the City from the risk of accidental loss. These goals are accomplished through efforts of the Risk Management Committee, ensuring a systematic process to identify, measure and control loss exposures to persons and property.

The Assistant City Manager is responsible for various City-wide programs that include Risk Management, City claims, City property recovery and litigation administration, environmental and sustainability programs, administration of regional and community issues, Community Emergency Preparedness programs, collective bargaining, and support to the achievement of Council priorities.

FY16 & FY17 Highlights

- Supported the establishment and implementation of Silicon Valley Clean Energy Authority to provide clean energy to residential and commercial customers
- Participated in regional efforts for community meetings, public hearings and mitigation efforts in response to aircraft noise
- Completed a 10-year successor agreement for contract fire services with Los Altos Hills County Fire District and Santa Clara County Central Fire Protection District
- Developed partnership with community, police and Santa Clara County Fire to support, enhance and encourage advancements in emergency preparedness
- Implemented public education and community outreach efforts for water conservation commensurate with Cal Water, Santa Clara Valley Water District and state mandates for water reduction
- Addresses environmental issues focused on climate action, water and energy conservation and sustainable environments
- Promotion of efforts to engage employees in professional development opportunities

- Engaged in community outreach, events and activities with citizens, organizations and in regional programs
- Implementation of best practices in risk management programs
- Established a City-wide Minimum Wage
- Implemented Open City Hall and City Manager Weekly Update
- Implemented parking management solutions
- Facilitated purchase of Lincoln Park

Noteworthy Items of FY18 & FY19 Budget

- Includes a limited-term Management Analyst Fellow position
- Includes budget for a Downtown Green
- Subsidized Rideshare pilot program
- Pop Up Dining Furniture
- Bike Share pilot Program

FY18 & FY19 Goals

- Continue sound management of City resources
- Continue development and implementation of community emergency preparedness program in partnership with Santa Clara County Fire and community volunteers
- Complete first year implementation of Silicon Valley Clean Energy services to residents and commercial customers
- Continue environmental and sustainability programs along with community outreach and education efforts
- Continue to promote employee professional development opportunities
- Through the leadership of the Risk Management Committee and with the assistance of risk partners, continue best practices in risk management programs
- Support and advance the City Council's priorities
- Implement new community engagement techniques
- Promote economic sustainability
- Advance plans to address aging infrastructure and facilities

Did You Know?

- Once agricultural land, Los Altos was originally developed with the intention of being a commuter town connecting Palo Alto and Los Gatos by train. Train service stopped in 1964 and the Foothill Expressway was created in its place
- The City of Los Altos is a designated Bike Friendly Community Bronze Level by the League of American Bicyclists
- Los Altos was named an Age-Friendly City by the World Health Organization

GENERAL GOVERNMENT DEPARTMENT

The Administrative Services Department encompasses the Finance, Human Resources, and Information Technology divisions. These departments are responsible for meeting the needs of the both internal departments and external customers. Together, these departments ensure that City departments have the resources they need to operate effectively.

The Finance Division is responsible for the safeguarding and accounting of the City's financial assets. This includes the development and management of the budget, reporting of financial information to the City Council and various regulatory agencies, completion of the annual audit process, and investment of the City's assets in accordance with the City's investment policy. The division also handles payroll, accounts payable, accounts receivable, and business license.

The Human Resources Division oversees the City's employment process including recruitment, employee development and training, payroll support and benefit administration. The division ensures compliance with applicable laws and coordinates the employee evaluation process.

The Information Technology Division maintains the City's network infrastructure and applications to ensure that critical city operations can operate 24/7. The division supports technology initiatives within departments to enable greater efficiency using technology.

FY16 & FY17 Highlights

- Completed the annual audit process and produced the City's Comprehensive Annual Financial Report (CAFR) for the fiscal years ended June 30, 2016 and 2015.
- Implemented a paperless payroll process in the Summer of 2015
- Implemented a new Talent Management System that provides applicants the ability to apply for city employment opportunities directly through the City of Los Altos website and simplifies the new employee on-boarding process
- Email system upgrade (2015-2016) migrated local Exchange 2007 mail server to Microsoft Office 365 cloud-based platform, coupled with an in-house mail archiver to improve service availability, manageability, user friendliness and the efficiency for email search.
- Server and backup system upgrade (2016-2017)

 completed the first phase of server upgrade with a new hyper-converged server. Reduced space and electricity consumption by consolidating workloads from five physical servers. The new backup appliance provides local and cloud backup to minimize the risk of losing business continuity in the event of major disaster.

Noteworthy Items of FY18 & FY19 Budget

- Includes a 2-year limited-term
 Management Analyst Fellow position
- Increased funding for enhanced recruitment for vacant positions
- Includes appropriation for staff recognition and retention initiatives through newly formed Workplace Innovation Team (WIT)

FY18 & FY19 Goals

- Implement a new Financial Enterprise Resource Planning system to replace the City's end of life Financial software, which will enable to the City to streamline operations and make information more readily available
- Update City Personnel Policies and support labor negotiations with employee bargaining groups
- Implement new employee evaluation process
- Re-start the City's wellness program
- Continued enhancement of the City's technology infrastructure, including the replacement of servers
 with hyper-converged technology, replacement of City telephone system, implementation of mobile
 device management, and upgrading key business systems
- Provide quality customer services consistently and introduce new technology to streamline processes and improve productivity

Did You Know?

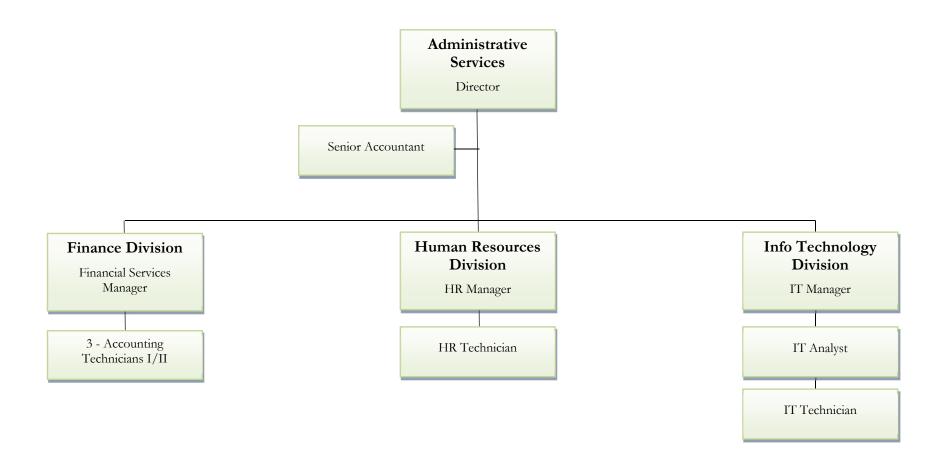

- The Finance Department processes over 8,500 invoices annually
- On average 3,600 business applications (new and renewals) are processed per year
- Since the install of our messaging archiver in November, 2015 our City has received 1.5 million emails and we receive on average 3,000 emails every workday!

ADMINISTRATIVE SERVICES DEPARTMENT

The Community Development Department is comprised of the Planning and Building Divisions, which are responsible for current and long range development and related goals, policies, programs, and regulations.

The Planning Division is responsible for the development and administration of programs guiding the physical development of Los Altos, using the General Plan goals, policies and implementation measures to develop regulations and to provide framework for land use decisions and development review, neighborhood and business district Specific Plans, policy documents such as Architectural Design Guidelines, and the City's Zoning Ordinance. The Division also performs land use and environmental review of development proposals and general public information services, including front counter, telephone and email support, staff-level project meetings, and pre-application development review. The Division supports the Historical, Design Review, and Planning and Transportation Commissions, and the City Council. Division staff further administers the affordable housing, tree protection, preservation, flood plain, sign ordinance, and Climate Action Plan programs.

The Building Division is responsible for performing architectural and structural plan checks, scheduling and performing building inspections, and providing general customer information services, in addition to updating and administering the California Building Code and amendments to this code that are specific to the City of Los Altos.

FY16 & FY17 Highlights

- Instituted the update of the Loyola Corners Specific Plan including the preparation of a circulation study and economic analysis
- Processed the Jardin Avenue Annexation to approval by the Local Agency Formation Commission – this resulted in the addition of six residential parcels to Los Altos and changed the City Limit line
- Processed an application for a five story twentyone (21) unit residential building at 4880 El Camino Real; the project contains affordable residential units
- Took the Downtown Building Committee's recommendations for changes to zoning code for some of the Downtown Zone districts through the Public Hearing process and on to a hearing before the City Council which approved the code amendments
- Initiated the Downtown Vision Process including conducting an RFP and hiring a Consultant to engage the community and develop a vision for the Downtown
- Developed and received approval for some amendments to the zoning code that provides for the expiration of incomplete applications
- Selected a consultant to review the recommendations of the former Parking Advisory Committee and provided the City Council with an overview of the Consultant's findings and recommendations
- Processed a single-story overlay district request for the Larkellen Neighborhood
- Identified a permit tracking software vendor that will allow for more efficient tracking of development applications and permits plus the scheduling of construction inspections
- Update and adopt the 2016 California Building Codes

Noteworthy Items of FY18 & FY19 Budget

- Increased budget to support implementation of new permit software
- Adjusted revenue to reflect projected decreased in demand of City permits
- Continued funding in budget for Downtown Visioning and Loyola Corners Specific Plan update

FY18 & FY19 Goals

- Complete the Loyola Corners Specific Plan Update
- Complete the Downtown Vision Plan
- Complete amendments to the CT zoning code and Density Bonus regulations
- Complete amendments to the Accessory Dwelling Unit regulations
- Identify a Housing Provider Partner
- Maintain full staffing levels
- Maintain fully-allocated cost recovery for the Department
- Implement the identified electronic permit tracking software system

COMMUNITY DEVELOPMENT DEPARTMENT

The Public Works Department provides stewardship of the City's infrastructures and is responsible for Engineering and Maintenance services.

The Engineering Division oversees capital improvements projects, provides knowledgeable counter service at City Hall, develops budget-appropriate solutions for infrastructure improvements, explores and takes advantage of outside grant fund opportunities, and support Council goals related infrastructure improvements.

The Maintenance Services Division provides for the maintenance of streets, parks, wastewater collection/storm drainage collection systems, building facilities, fleet and equipment. Specific responsibilities include:

- Streets Section maintains 104 miles of City streets to ensure safe conditions for motorists, bicyclists and pedestrians, responds to potholes, stop and yield sign repairs within 24 hours, inspect all storm drain outfalls and address flow line and drainage problems
- Parks Division maintains 52.5 acres of City Parks and 42 acres of City landscape boulevards
- Sewer Section maintains 108 miles of sewage collection system and responds on a 24 hour basis to all residential and users. In addition, Sewer Section maintains 6.3 miles of creeks and 55 miles of storm drain pipes.
- Facility Maintenance maintains 136,000 square feet of buildings/facilities for all City buildings. It provides all preventative maintenance services on schedule and corrective maintenance on a priority basis and ensures

buildings meet Fire Department and Health Department requirements

• Fleet provides automotive/equipment maintenance and repairs for 71 vehicles for all divisions.

FY16 & FY17 Highlights

- Adopted Stormwater Master Plan
- Completed comprehensive city-owned facility condition assessment
- Completed citywide street tree inventory
- Completed Fremont Bridge Project
- Adopted Solid Waste Ordinance and Construction and Demolition Debris Ordinance
- Implemented water conservation measures for city facilities and exceeded 25% water reduction goal mandated by the State

Noteworthy Items of FY18 & FY19 Budget

- Includes \$80,000 for various City beautification projects
- Reflects expenditure savings in gasoline costs due to hybrid fleet of vehicles
- Increased budget for playground inspections and improvements
- Includes \$50,000 for new standby sewer truck and other equipment (Sewer fund)
- Added \$25,000 for Redwood Grove Restoration
- Substantial increase in funding to adequately maintain large trees throughout the City (\$150,000)

FY18 & FY19 Goals

- Design and construct a new/refurbished Hillview Community Center by December 2020 consistent with City Council priority
- Continue to implement Bicycle and Pedestrian Master Plans with focus on school route improvements
- Support the creation of a 10-year Capital Facilities Plan and its on-going updates
- Implement funded pavement improvement projects
- Implement stormwater Municipal Regional Permit requirements and continue efforts to meet 100% trash capture reduction by 2022.
- Conduct public outreach and opinion survey for the creation of dedicated funding sources for the stormwater program
- Continue implementation of Sanitary Sewer Master Plan and Sanitary Sewer Management Plan to maintain serviceability of the sewer system and reduce Sanitary Sewer Overflows.
- Perform sewer rate study and adopt new sewer rates
- Continue to work with solid waste collection service provider to increase waste diversion rate to 76%
- Evaluate and implement a new asset management computer system to better manager cityowned facilities and infrastructure

Did You Know?

- Last fiscal year the City Public Works Department flushed 107 miles of sewer line. That's more than the distance from Los Altos to Big Sur, CA.
- We maintain 6,474 total trees with anticipation of planting 350 more in the next fiscal year. These trees provide approximately \$874,929 in total eco benefits which is a combination of greenhouse gas benefits, water benefits, energy benefits, air quality benefits and property benefits.
- Maintenance maintains 104 miles of city streets and 108 miles of sewage collection systems.

PUBLIC WORKS DEPARTMENT

The Police Department is a vibrant, progressive and professional organization dedicated to fostering and maintaining community partnerships. These partnerships promote an enhanced quality of life for our community and ensure that the City of Los Altos remains a great place to live and raise a family. We are committed to our community's public safety priorities; Child and School Safety, Traffic Safety, Safe and Secure Neighborhoods, Safe Shopping Districts, and Emergency Preparedness.

This two-year budget maintains current service levels. The core services provided by the Department are: response to emergency and non-emergency calls for service; proactive identification of criminal activity, traffic safety, investigation of crime and prosecution of criminals, 911 call taking and emergency dispatch services, training of personnel, crime prevention and community outreach, code enforcement, maintenance of records, and property and evidence control.

FY16 & FY17 Highlights

- Successful implementation of the Tri-City virtual consolidation CAD project
- Continued Expansion of Neighborhood Watch/Block Captain program
- Improved School Resource Officer program through expanded outreach/education
- Expanded the department's Social Media Presence
- Expanded Community Policing through new programs such as the YES Campaign and Pumpkin Carving with a Cop.
- Additional Police Captain position to enhance City and Community Emergency Preparedness efforts through stronger community partnerships
- Coordinated to purchase a dedicated Community Emergency Preparedness container & cache of supplies through the Los Altos Community Preparedness Program (LACEPP).
- Added a Traffic Officer position to enhance traffic safety through education and enforcement

Noteworthy Items of FY18 & FY19 Budget

- Increased budget for crossing guard services
- Includes \$15,000 for Women SV services
- Adjusted revenue and expenses to better match past trends and history
- Increased focus on retention and recruitment of sworn and non-sworn personnel
- Budget reflects changes of new labor agreement set to take effect July 1, 2017

FY18 & FY19 Goals

- Maintain focus on our Community Priorities
 - o Child and School Safety
 - o Traffic Safety
 - o Safe and Secure Neighborhoods
 - o Safe Shopping Districts
 - o Emergency Preparedness
- Enhance Community Policing and Customer Service efforts
- Expand outreach and strengthen community partnerships related to Mental Health and Domestic Violence Issues
- Finalize implementation of the Tri-City virtual consolidation Web RMS Project
- Emergency Preparedness program enhancements

LOS ALTOS POLICE DEPARTMENT

The Recreation & Community Services Department provides comprehensive recreation programs and services for all ages. Community programming for youth and adults includes classes and camps that focus on wellness of both the mind and body. There is special interest art programming that covers different medias such as watercolors, crafts and computer generated illustrations. The visual arts are also represented through the Youth Theatre program. There is a very robust offering of physical fitness classes ranging from boot camps to chair exercise classes. Sport camps and classes are also a big part of the physical fitness opportunities for the community. Department managed special events are a big part of creating community in the Los Altos area. Events like the Summer Concerts and the New Year's Day Fun Run bring in 700-1000 people per event. Teen focused programming takes place at the Teen Underground facility, while seniors have options to participate in senior focused programming at two locations. Facility rental is managed by the Department and is an additional service for the community and community based groups.

The Recreation & Community Services Department operates in a professional, cost effective manner with a focus on outstanding customer service while keeping pace with the changing community needs and priorities. The Department budget restructuring continues for the FY18-19 budget years. Budget headings have been adjusted to best represent the programming of the designated area. This adjustment also makes expenditure comparisons to the corresponding revenues easier. Cost recovery is an important part of the Recreation & Community

Services budget, and staff will continue to strive for maintaining a direct cost range of 80%, as it has in prior years.

The budget for FY18-19 reflects a balanced approach to department expenditures utilizing both internally run and contractually run activities. Internally, the department budget reflects resources for supplies, facility requirements, and the use of full and part-time staff. Also reflected is contractual usage that helps make it possible to offer diverse activities that serve a wide range of needs across all ages.

FY16 & FY17 Highlights

- Added an additional 2 weeks of the very popular Camp Jellybean in 2016
- Increased use of volunteers in city programs by 5.2%
- Increased programming at Grant Park by adding Monday Senior programming, contract summer camps, and a couple of new classes
- Added new Holiday Camps, Arts and Craft Camp, and new classes
- Offered new teen programming for LAYC dance members that included mobile games truck and open teen play night at the Underground
- Received input on programming needs through use of online community outreach program (Open City Hall)
- Installed new hydration stations with bottle fillers at three different parks (Marymeade, McKenzie, Montclaire)

Noteworthy Items of FY18 & FY19 Budget

- Included appropriation to replace various athletic and camp equipment
- Increased \$15,000 for professional activity guide printing
- Increased budget for Junior High Coaches
- Increase of \$6,000 for script royalty fees

FY18 & FY19 Goals

- Facility improvements at Grant Community Center
- Improvements to Garden House and Underground
- Resurfaced the tennis courts at McKenzie and Montclaire Parks
- Launch improved recreation registration software
- Rebrand the teen programs to increase participation for younger teens
- Involvement in Project Management Team for the new Hillview Community Center
- Assumed programming for the annual Glorious 4th event at Shoup Park
- Programming responsibilities for the Downtown Green event
- Implement increased art events and programs in collaboration with the Public Arts Commission
- Create more public surveys through Open City Hall program

Did You Know?

- The Recreation and Community Services Department offers over 2,550 programs and classes each year
- In calendar year 2016, 155 members of the community volunteered for the City of Los Altos totaling 10,125 hours

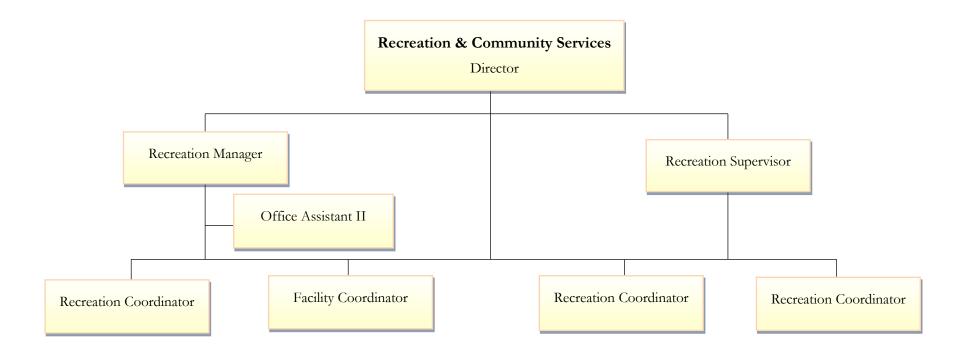

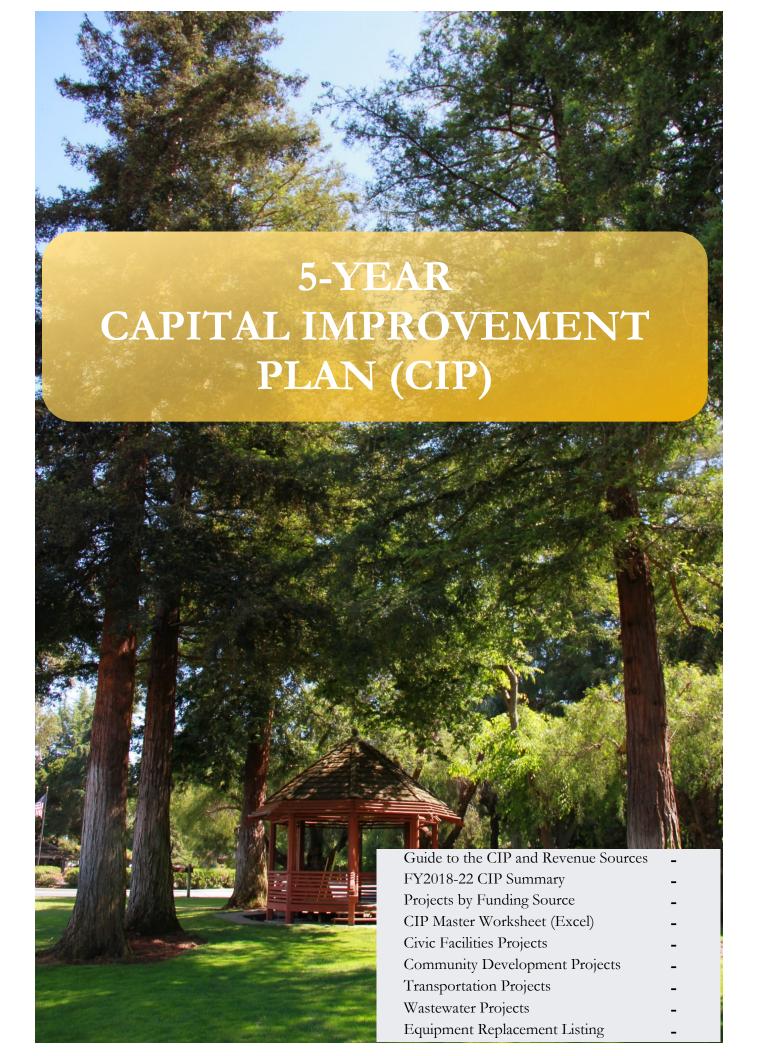

RECREATION & COMMUNITY SERVICES DEPARTMENT

GUIDE TO THE 5-YEAR CIP

Introduction

The Capital Improvement Program (CIP) identifies the City's capital investments over a five-year term. It is both a fiscal and strategic device that allows for the planning, scoping, prioritization and monitoring of all capital projects. The document quantifies and defines costs, funding sources, departmental responsibilities, project phases and timing. Each year the CIP is reviewed and updated as part of the City-wide financial planning and goal-setting process. At the same time, it sets a vision for long-term planning. It is also valuable as a community outreach and communications tool as it speaks to major tax dollar investments that are placed in direct and very visible City-wide infrastructure improvements. Such projects involve larger dollar expenditures that normally have a long useful life cycle.

The CIP includes five years of projected capital needs, the first year of which will be appropriated within the annual budget process. Dollars in the first year of the five-year CIP will be authorized for spending in the project planning, bidding and award process. The remaining four years of the CIP serve as a proposed financial plan subject to annual review.

How this Document is Organized

The CIP is broken down into three major sections. The first section is a high level overview that describes projects from a variety of informational perspectives. In this section, projects are presented by year, by category and by funding source. Each project has been assigned a categorical priority designed to support the City's overall goals. In doing so, capital projects have been assigned one of the four following priority classifications:

- Health & Safety
- Asset Preservation
- Efficiencies/Cost Savings
- Quality of Life

Guide to the five-year CIP

The second section provides a detailed description for each capital project within an improvement area or category. These categories are designed to emphasize the particular infrastructure needs of Los Altos, as noted below:

Civic Facilities Community Development

Transportation Wastewater Systems

- Civic Facilities: Includes general upkeep, repair and replacement of parks, buildings and associated infrastructure and amenities in support of the wide variety of services the City provides to the community.
- Community Development: Includes general infrastructure, civic planning, storm drain, technology

- enhancements and facilities of a general service nature. Examples include bridges, lighting and median landscaping, technology, communications, master plan and special project studies.
- Transportation: Includes roadway enhancements and improvements geared towards pedestrian and bicycle safety, and efficient traffic flow. Upgrade and maintenance is a core part of this category, as well as signal lighting, street striping, traffic calming measures and intersection improvements
- Wastewater Systems: Includes improvements to maintain and improve essential sewer systems vital in the preservation of health and safety. This is a highly regulated and environmentally-sensitive area and exists in a self-sustaining fee-based model.

Each of the project descriptions within the various service areas display projected costs for each of the next five years including the proposed allocation for FY 2017/18, planned costs for the following four years, a brief description of each project, the identified area of priority/benefit and a brief commentary of the status of ongoing and current expenditures. For projects where the operational cost impact is known, this information is also included in the description. Inflationary factors are also included where appropriate. All active and proposed projects are developed into individual five-year project formats.

The Capital Improvement Program is an invaluable component of the City's effort to provide a safe, healthy and attractive community.

CIP REVENUE SOURCES

How CIP projects are financed

When it comes to CIP projects, many cities like Los Altos, have had to develop a series of internal and external funding mechanisms. This is because local government resources are limited in nature. Many funding sources are restricted in use and subject to discretionary State subventions. Furthermore, local government revenues are highly sensitive to economic movement and prospects for increases are few and far between. As a result, Los Altos has funded a core percentage of general service improvements from its General Fund, placing such resources in direct competition with operational needs.

Wherever possible, the City seeks out external funding sources. These sources, which are restricted to specific application areas, are defined below:

Restricted Revenue Funds:

Roadways & Traffic

- <u>Gas Tax</u> Financing is provided by the City's share of the State tax on gasoline, which can only be used for the research, planning, construction, improvement, maintenance, and operation of public streets and highways or public mass transit corridors.
- <u>Transportation Grants</u> Grant funding from State and Federal sources that can only be used for transportation improvement projects in the City's rights-of-way. Grants of this type in the Silicon Valley have originated from such agencies as the Valley Transit Authority, Federal Stimulus Funds, and the Metropolitan Transit Commission, among others.
- Traffic Impact Fees Developer fees in the form of Traffic Impact Fees (TIF) can assist in the area of traffic capacity and flow. TIF funds are generated through the increase in residential housing living units and can be applied to traffic impacts with a focus on enhancing traffic flow and calming measures. Such fees are designed to have developers contribute towards the impact of growth in the local jurisdiction.
- <u>State Traffic Development Act Funds</u> The Transportation Development Act (TDA) provides two major sources of funding for public transportation: the Local Transportation Fund (LTF) and the State Transit Assistance fund (STA). These funds are for the development and support of public transportation needs that exist in California and are allocated to areas of each County based on population, taxable sales and transit performance. The allocation of these funds is discretionary at the State level.

Community Facilities

• <u>Park-In-Lieu Fees</u> - Funding for open space and parks and recreation facilities can be derived from State and Federal grants and/or mostly developer fees. Developer fees in this area, referred to as Park-in-lieu Fees (PIL), are generated based on the growth in the number of livable housing units and can be applied to the acquisition, design,

construction or repair of parks and recreation properties and facilities.

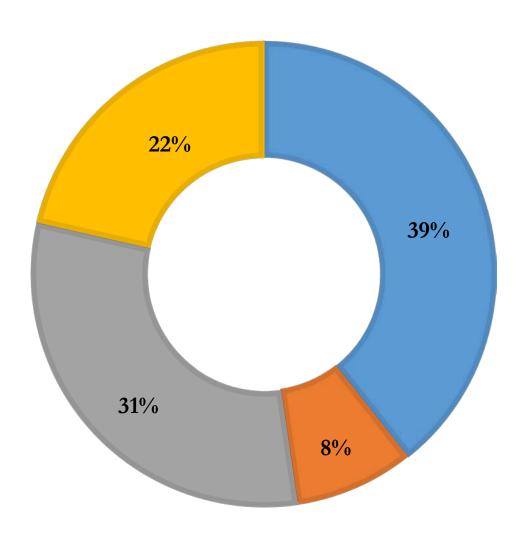

• Enterprise Funds

• Wastewater - Funding from the services rendered on a user surcharge basis to residents and businesses located in Los Altos and municipal service charges to Los Altos Hills for their pass-through use of the City's system. These revenues also support operation and maintenance of the utility systems. The capital portion is used for underground pipelines, diversion systems, pump stations and distribution channels. CIP project costs in this area are supported by a multi-year Master Plan for this substantial utility system.

Although the City also maintains storm water systems, those utility costs are not fee-based funded at this time and rely on General Fund transfers.

Covington Road Bicycle & Pedestrian Improvements

The comprehensive Blach Neighborhood Traffic Study prepared by Fehr & Peers in December 2010 identified a number of recommendations to improve and enhance vehicular, pedestrian, and bicycle traffic in the Blach School neighborhood area.

In order to enhance the pedestrian and bicycle safety of students accessing Blach Intermediate School, a new sidewalk will be constructed on the south side of Covington Road from Miramonte Avenue to Eastwood Drive. The project will also provide bike lanes for both east and west-bound directions.

The project is listed as a Tier 1 improvement, meaning it will have the largest impact to students' safety and circulation.

Total	446,000		 			446,000

The project provides for rehabilitation or replacement of existing bicycle and pedestrian pathway infrastructure that is not on the street system.

Improvements will be based on condition assessment, the City's Pedestrian Master Plan, Bicycle Transportation Master Plan, and Parks Plan. Three pathways are scheduled for rehabilitation during the summer of 2017.

Park Hydration Station Installation

After a review of the Los Altos parks drinking fountains, staff found a need for the replacement of several of the 15 drinking fountains. The Parks and Recreation Commission has also reviewed the conditions of the drinking fountains and created a prioritized list to replace all of them. The Commission also

made a recommendation to immediately replace three drinking fountains with "hydration stations" that include a drinking bowl, dog bowl and bottle filler. Staff created an estimate for the purchase and contract installation cost of hydration stations to replace drinking fountains at:

- 1. Marymeade
- 2. McKenzie
- 3. Montclaire Parks

This project is to be funded by the In-Lieu Park Fund. The project is expected to be completed within a two-month period.

This is a capital project for the repair, non-routine maintenance and improvements of civic facilities throughout Los Altos. Projects will include deferred and ongoing maintenance identified in the 2016 Comprehensive Civic Facilities Condition Assessment as well as facility improvements

and upgrades to better serve the community. This project will also fund initial study or preliminary engineering for larger scale projects which may require separate project accounts.

Previous CIP project, 04-08, funded in FY 14/15 called for replacement of aging HVAC components including air conditioning units and heating hot water boiler, and repair of existing temperature controls. Upon initiation of design, it was discovered that additional work should be completed to operate

the City Hall HVAC system efficiently if it is expected to remain in service for 10 or more years.

The project includes upgrades to the existing City Hall building HVAC system, including related demolition, electrical and structural work. The base bid includes, but is not limited to: replacement of existing air handler and return air fans with new air conditioning units, re-balance of air distribution system, replacement of heating hot water boiler and pump, installation of direct digital control (DCC) panel and providing temporary cooling or heating as needed.

Grant Park Community Center Improvement Project

The Community Center at Grant Park was part of a school site that was acquired by the City and repurposed for community use. The scope of this project includes various exterior and interior improvements to provide improved aesthetics, ADA accessibility, and better functionality for an

overall better user experience. Exterior improvements include classroom building roof replacement and exterior painting. The classroom building roof replacement was completed in 2015. Interior improvements include interior painting, restroom updates, miscellaneous improvements to the meeting rooms, acoustic improvements and flooring replacement in the multipurpose room.

Annual ADA Improvements (Facilities)

The project will continue efforts to improve Americans with Disabilities Act (ADA) accessibility within public facilities throughout the City. This would include improvements to connections to public right of way, entrance walks, entrance ramps, stairs, doors, transaction counters, public offices,

75,000 525,000

conference and meeting rooms, public restrooms, public offices, recreation environments/features, parking and passenger loading, drinking fountains, and other elements identified in the City's ADA transition plan adopted by City Council in 2014.

ADA compliance is a federal requirement.

The existing stand-by generator at City Hall was installed in 1998 and was brought over from the Police Department. The City has been required by Bay Area Air Quality Management District (BAAQMD) and California Air Resources Board (CARB) to register the emergency generator under the Portable

Equipment Registration Program. The generator is subject to unscheduled inspections by the State for compliance with emission requirements. While the existing generator is meeting the current emission requirements, it is aging and at risk of exceeding emission standards soon. The new more energy-efficient Cummings generator will meet all BAAQMD requirements and will be more cost-effective to operate.

Lincoln Park Utility Undergrounding

This project will underground the existing aerial electrical distribution and communication lines located within and adjacent to Lincoln Park from West Edith Avenue to Sherman Street. The project will be completed utilizing a combination of Santa Clara County Rule 20A funds, paid

directly by PG&E, and the City's Capital Improvement Project fund. The City is responsible for costs associated with the formation of the underground utility district and other site-specific construction costs not covered by Rule 20A funds. While the formation of the underground utility district will occur in fall 2016, PG&E estimates actual construction of the project will begin in five to seven years. The aerial transmission electrical lines located at the top of several poles are not eligible for use of Rule 20A funds and are not included in the scope of this project.

This project will continue the streetscape improvements on First Street from Main Street to San Antonio Road. The objectives of the project include providing improved public infrastructure and ensuring design continuity to increase public

access, enhance pedestrian/bicycle safety and invigorate this portion of the downtown area. The project will address design layout, pedestrian scaled lighting, site furnishings, street trees, landscaping, drainage, grading and provide typical cross sections.

Project implementation will be completed in two stages. The first stage will determine the scope and limits of the project. This stage will include the identification of design considerations including parking related issues, property setbacks, and project limits within the public right-of- way. Public meetings for this stage will include presentations to the Planning and Transportation Commission and the City Council. The project will proceed to the next stage upon Council approval of the project scope and limits.

Stage two of the design process will address the actual streetscape layout and landscape elements. The services of a civil engineer/landscape architect will be secured to assist staff in the development of the project design plan. Public meetings for this stage will include meeting(s) with First Street property owners and tenants, as well as presentations to the Los Altos Village Association, the Chamber of Commerce, and the Planning and Transportation Commission.

Commercial Wayfinding Sign Program

Les altos

Downtown

Left on Main St.

The City of Los Altos currently has a wayfinding sign system made up of a collection of different sign types and styles that have been developed over the course of several decades. The existing signs lack cohesion and are not comprehensive in nature. Not all destinations are signed for, and there are no signs

within the commercial districts that direct patrons to parking. This project would create a comprehensive wayfinding sign system to direct visitors to the commercial districts and civic destinations in Los Altos.

Phase 1 of the project includes key directional signs for all the commercial districts along

Foothill Expressway, El Camino Real, San Antonio Road, and El Monte Avenue. Phase 1 also includes the parking directional signs in downtown and Loyola Corners. Phase 2 is yet to be scheduled.

As part of the design approval for the new office building at 467 First Street, City Council requested a capital project be developed to provide additional screening trees in the landscape median on Foothill Expressway from San Antonio Road to W. Edith Avenue.

The Foothill Expressway corridor median is planted at irregular intervals with either trees or Oleander shrubs. No stretch of Foothill has continuous landscaping, and the commercial districts in some cases have no landscaping in order to heighten visibility. The corridor between San Antonio Road and W. Edith Avenue has the most continuous planting of median trees. This project will entail 36" box trees, 25' on center, to fill in the gaps with the existing street tree pattern on the median of Foothill Expressway from San Antonio Road to W. Edith Avenue. Irrigation will be installed to support the establishment and health of new trees.

This project will be completed in coordination with TS-01018 Foothill Expressway Improvements.

Downtown Vision

In January 2015, the City Council identified development of a Downtown Plan as a priority. In May 2015, Council provided further direction that an initial step be a visioning process (confirmed as a Council goal in February 2017). This visioning effort will be focused on identifying the community's desired

level of downtown economic vibrancy, what type and intensity of development is required to achieve that, and the related consequences/impacts. Three to four scenarios will be developed followed by public input sessions and feedback opportunities to ensure broad community comment. Based upon the result of this effort, the appropriate next steps for development of a Downtown Plan will be determined.

Downtown Parking

In September 2013, the City Council adopted the Downtown Parking Management Plan. One of the strategies identified to increase parking supply is the construction of a parking structure. In June 2014, the Los Altos Chamber of Commerce released a subcommittee report (revised in October 2014) that

considered numerous aspects of a downtown parking structure as a long-term solution, including a shared City/Downtown property owners financing model. In March 2015, an ad hoc City-wide Parking Committee was founded to evaluate policies and methods to effectively provide adequate parking downtown. Recommendations of this ad hoc committee have been reviewed and are being given further consideration.

Based upon the results of the Downtown visioning process (CIP Project CD-01013) and other Downtown-related Council decisions, this project would be initiated to identify, evaluate and implement short-term parking management methods and maintain a readiness to engage a parking structure design group to develop schematic designs for a parking structure if this is an identified course of action. This effort will include public outreach and engagement.

Public art enhances and defines the image of a City. It engages individuals by creating a dialogue within the community. It has the potential to make a city more livable and to provide economic benefits to the City and its businesses.

The Public Arts Commission was created to bring about public awareness of visual arts. While the City has developed a public outdoor sculpture program, opportunities abound to expand into other mediums such as paintings, murals, photography, etc. To date, all public art activities within the City have been completed on a case-by-case basis with no clear correlation between projects. The Public Arts Master Plan will provide a clear vision and direction for the acquisition, installation and maintenance of public art within Los Altos.

Climate Action Plan Implementation Program

Climate Action Plan Implementation: A. Prepare an updated emissions inventory. B. Update the CAP to incorporate new technology programs and policies that reduce emissions and consider a reduction target for future horizons consistent with State legislation. C. Update and amend the CAP as necessary

should the City Find that specific measures are not achieving intended emission reductions.

In 2010, 14 cities and Santa Clara County entered a Joint Powers Agreement (JPA) to form the Silicon Valley Regional Interoperability Authority (SVRIA). Through significant collaboration by participating members and stakeholders, SVRIA has developed a regional interoperable communications

The total cost to complete the build out of the radio system infrastructure for the entire County is estimated at \$29,000,000. The City of Los Altos portion of the system expense is 0.87% of the total users on the system, which equals \$249,943. Los Altos' share of ongoing operations and maintenance costs for the project is estimated to be \$33,000 annually beginning in FY2018/19 and will be accounted for in the operating budget at that time.

IT Initiatives

The initial phase of the City's IT strategic roadmap will focus on updating the City's core IT infrastructure, which will provide a stable base from which the other initiatives will be built upon. The most critical portion of this phase is the installation of the hyper-converged infrastructure and

Once completed, the second phase of the strategic roadmap will focus on business continuity, specifically targeting backup, disaster recovery, and the modernization of the City's data center.

The third phase of the strategic roadmap will target the business applications utilized by the City, which include applications utilized by finance, building, recreation, and voice communications. This phase will have the greatest impact on the public as the majority of the applications are customer-facing and the modernization of them will provide new online capabilities.

The final phase of the roadmap targets a complete hardware refresh of the technology utilized by the City, focusing on systems that weren't replaced or updated during the initial phase of the project. The City will look to implement a Virtual Desktop Infrastructure (VDI) that will replace the desktops and laptops with VDI clients, allowing the IT staff to respond more quickly to the changing needs of various departments while reducing maintenance and security threats.

Annual Storm Drain Improvements

An important element of the Los Altos infrastructure is the network of storm water conveyance facilities that deliver storm water runoff to the four creeks in Los Altos which terminate at San Francisco Bay. These facilities include curbs and gutters, drainage swales, drain inlets and catch basins,

underground pipes ranging from 12 inches to 66 inches in diameter, manholes, and outfalls at the creeks.

This project provides for rehabilitation or replacement of existing infrastructure, installation of new infrastructure, and professional services as they relate to special studies or reports needed to remain in compliance with the San Francisco Regional Permit (MRP under the National Pollutant Discharge Elimination System (NPDES) permit.

Planned activities for 2017/18 include:

- Completing Windimer Ditch construction
- Completing design for Milverton Road and begin construction if regulatory agency approves project approach
- Complete Green Infrastructure work plan
- Public outreach and polling for a dedicated funding source for a stormwater program

Street Resurfacing

The annual street resurfacing project places an overlay of asphalt concrete (AC) on existing street surfaces that are approaching the end of their useful life, as evidenced by cracking and minor pavement failures. Cutouts and repairs of pavement failures, and

grinding down pavement at outer edges and/or curbs may be included. Installation of pavement fabric in addition to pavement striping and stenciling after the resurfacing, repair of damaged curb and gutter, and minor drainage improvements are also included in this project.

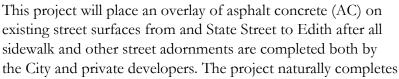

Streets are selected for resurfacing in coordination with a Pavement Management Program (PMP) that provides a City-wide ranking of the condition of all the streets maintained by the City. The actual number of streets resurfaced is dependent upon both the condition of streets and the bidding climate. City policy is to expend the amount budgeted rather than resurface an exact number of miles of streets.

Roadway striping and markers throughout the City need to be refreshed on a regular basis. Adjustments of striping on existing roadway to reduce conflicts are also considered. Visibility of pavement markings is important to prevent traffic accidents and improve traffic flow.

This project will refresh City streets with thermoplastic pavement striping each year. It will also improve striping layouts per the City's Pedestrian Master Plan and Bicycle Transportation Plan where appropriate. Thermoplastic lasts for approximately seven to eight years. This project allows the City to complete a striping cycle on an eight-year basis in accordance with requirements and to maintain the acceptable conditions.

Street Slurry Seal

This project slurry seals City streets annually, and may include cutout and repair of minor pavement failures, and installation of striping. The seal typically places a thin layer of sand and oil over City streets. Neighborhood streets should receive a

surface treatment (slurry seal) other than an overlay every seven years. Sealing is a preventative maintenance treatment that prevents moisture from penetrating the pavement and softening the base material supporting the pavement.

Slurry seals have proven to be the best treatment for pavements in good condition based on life-cycle cost analysis because they extend the life of pavement for the lowest cost. Each application to streets in relatively good condition is expected to extend their useful life. Those streets selected for slurry sealing in any given year are chosen based on a City-wide ranking of the condition of all the streets that are maintained by the City. This process is done using the Pavement Management Program (PMP) developed by MTC.

Annual ADA Improvements (Streets and Roadways)

The project will continue efforts to improve Americans with Disabilities Act (ADA) accessibility within the public right of way (ROW) throughout the City. This would include ramps at various intersections throughout the City, correcting existing sidewalks that have inadequate access, ADA compliant

pedestrian push buttons at City street intersections and also improve accessibility by replacing pedestrian paths of travel that are uplifted, cracked, too narrow, or otherwise out of compliance with current ADA requirements.

Improvements will be based on the City's ADA transition plan and in conjunction with the Bicycle and Pedestrian Advisory Commission's recommendations.

ADA compliance is a federal requirement.

Existing alleyways within the City are in varying degrees of decay. Many have exceeded their useful life and must be replaced. This project will initiate a phased process of replacement and/or repair based on priority, the cost of the repair, and the amount budgeted. Miscellaneous concrete work

The project will reduce the effort required for patching of these alleys.

A funding alternative to expedite improvements would be to establish an assessment district for specific neighborhoods and/or businesses adjacent to and served by the alleys.

Fremont Ave Pedestrian Bridge Rehabilitation

This existing pedestrian/bicycle bridge was constructed in the mid-1970s and provides access to residents and commuters crossing Permanente Creek at Fremont Avenue. As result of the community outreach efforts in 2009 for the vehicular bridge replacement, concern over this structure was voiced. At

The feasibility study conducted in 2016 concluded rehabilitation to be the most cost effective and recommended alternative. Rehabilitation would include; replacement of timber decking, replacement of structural blocking and cross bracing, replacement of endspans middle glulam stringer, replacement of timber railing, installation of a drainage system, and backfilling of the first span to repair scour damage and loss of backfill material. Existing bridge abutments will remain.

Concrete Repair

The annual concrete sidewalk and curb/gutter repair project is intended to address the highest priority repair locations. The primary focus is on the replacement of damaged sidewalks that represent hazards to pedestrians. Staff continually receive complaints from residents regarding cracks or uplifted sidewalks that could cause a "trip and fall" type accident.

This project provides for replacement of cracked or uplifted sidewalks throughout the City that cannot be patched or ground down.

Traffic Sign Replacement

Agencies must conduct a signage assessment and maintain minimum levels of sign visibility. Signs degrade with time and the rules set within the Manual on Uniform Traffic Control Devices (MUTCD) set measurable retroreflectivity standards for signs to improve nighttime visibility to motorists. The

compliance date for meeting the minimum retroreflectivity requirements for regulatory, warning, and ground- mounted guide signs is January 2015. Overhead guide signs and street name signs must be in compliance by January 2018.

There are approximately 8,000 traffic signs throughout the City including street name signs. Implementing the new requirements begins with conducting a sign inventory, a milestone that has been accomplished and stored digitally on the City's Geographic Information System (GIS). Non-compliant regulatory signs, such as STOP and Speed Limit signs (approximately 2,000) will be replaced first. These signs cost approximately \$100 to \$200 each excluding installation labor. This project presents a phased approach to compliance with the MUTCD sign requirements.

Neighborhood Traffic Management Plan

The community impacts of traffic, both congestion and speeding, are major areas of interest. Roadway capacity constraints and large volumes of traffic have resulted in noticeable increases in traffic congestion on arterials and collectors. Traffic calming measures include, but are not limited

to, narrowing streets by installing chokers or "bulbs" at intersections, installing street tree chokers midblock, installing speed tables at intersections, raising intersection grades, raising crosswalks at mid-block locations, varying surface treatments at intersections, roundabouts and traffic circles, chicanes, striping, signage modifications, and landscaping.

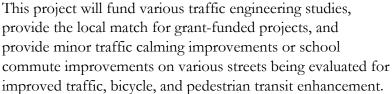

This project funds traffic engineering studies, the local match for grant-funded projects and minor traffic calming improvements or school commute improvements on various streets being evaluated for NTMP projects or school commutes. These projects are funded as identified and could provide minor traffic calming studies and improvements as directed by Council.

Transportation Enhancements

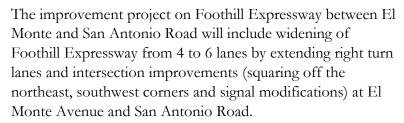

Work on this project may include deployment of traffic volume and speed counters, level of service analysis, recording pedestrian or bicycle counts, evaluating turning movements, preparing trip origin and destination studies, developing signal timing modifications, and preparation of supporting material for grant applications. This project also could provide funding for minor traffic calming studies and improvements as directed by Council.

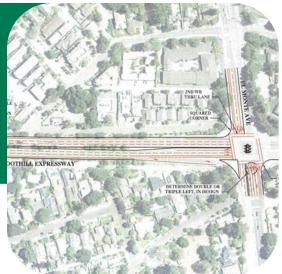

This project funded the preliminary engineering of safety improvements on Carmel Terrace; public outreach is ongoing. The public outreach may result in a pedestrian/bicycle improvement project at this location which will require a separate funding request at a later time.

Illuminated Crosswalk Replacement

This project will install new in-pavement flashing crosswalks at three locations:

- Springer Road at Rosita Avenue
- Almond Avenue (near Almond Elementary)
- Grant Road at Morton Avenue

The systems are not functioning and a replacement is not available because the manufacturer has gone out of business. A new in-pavement system will be selected for installation.

Miramonte Ave Path

The Los Altos Bicycle Transportation Plan places a high priority project to upgrade the existing bicycle route on Miramonte Avenue to a bicycle path between Mountain View at the north end to Foothill Expressway at the south end. This project also includes drainage improvements along the street since

The pathway connects the residential neighborhoods in Los Altos and unincorporated Santa Clara County with commercial centers in Mountain View. It may reduce traffic on Foothill Expressway and Miramonte Avenue by encouraging bicycling, reducing congestion in this corridor, and increasing capacity for pedestrians and bicyclists. The project is currently carried as a Tier II by VTA.

This project received a Vehicle Emission Reductions Based at Schools (VERBS) grant in the amount of \$1,000,000 for FY18/19. Therefore, the project will be phased to take advantage of this grant. Improvements on Miramonte from Covington to Berry will be constructed in FY18/19. The remainder will follow.

University Ave Crosswalk Improvements

This project will make improvements to two consecutive interchanges located on University Avenue at Lincoln Avenue and Burke Road. The intersections are to be improved to provide better pedestrian access to nearby schools, downtown Los Altos, Lincoln Park, and nearby churches. The improvements

include replacement or installation of curb ramps, a raised crosswalk, flashing beacon system, new crosswalks, and removal of ADA barriers. These improvements will enhance pedestrian safety and overall pedestrian access by improving visibility and connectivity.

Traffic Sign Battery Backup Systems

A battery backup system provides temporary electrical power to a signalized intersection in the event of fluctuations in power supply or power outages. The batteries are self-sustaining and will be included in the City's preventative signal maintenance program. The intersections which will receive battery backup systems include:

- San Antonio/Almond
- San Antonio/Cuesta
- San Antonio/Edith/Main
- Cuesta/El Monte
- University/Cuesta

- Miramonte/A/Fremont
- Grant/Covington
- Grant/Oak
- Grant/Fremont
- Homestead/Foothill

Crosswalk Improvements At St. Joseph & Deodara Dr

Two new curb ramps are proposed on the southwest and southeast corners of St. Joseph Avenue and Deodara Drive as a result of collaboration between the Montclaire School Community and the City. A new continental style crosswalk is also proposed at this intersection connecting the new curb ramps.

These improvements support non-motorized travel to and from Montclaire Elementary School.

Prior 2017/18 2018/19 2019/20 2020/21 2021/22

The 2013 Sanitary Sewer Master Plan Update recommended replacement of segments of pipes at various locations throughout the City that typically have multiple moderate-to-severe structural defects. Costs are based on the open-trench method of repair because defects include sags which are difficult

to correct using trenchless repair methods. The areas selected for replacement were identified in closed circuit video inspections accomplished from 2007 through 2010. This project has five phases beginning in FY 2013/14 to repair these segments.

South Sewer Replacement

The 2005 Sewer Master Plan identified approximately 8400 linear feet of sewer pipe that needed to be upsized. During the initial construction of this project in 2012 a portion had to be deferred to a future phase due to several utility conflicts. This project completes replacement of the pipe sections identified in

the 2005 Sewer Master Plan described as "South Sewer Replacement Phase 1" which is capacity-related work and South Sewer Main Replacement Phase 2 following completion of Phase 1.

CIPP Corrosion Replacement

This project consists of several phases of work to repair pipe corrosion using the cured-in-place pipe (CIPP) repair method for the trunk sewer. Phases 2 and 3 are identified in this project. The total length to be rehabilitated is approximately 20,000 lineal feet and pipe sizes range from 24-inch to 42-inch.

The work is in the largest pipe diameter sections in the system that deliver sewage to the Palo Alto Regional Water Quality Control Plant. The trunk sewer rehabilitation is divided into several phases to be more manageable and provide flexibility to rehabilitate the reaches that are most corroded as determined from future, more in-depth inspections of the trunk sewer pipe.

GIS Updates

Current and updated maps are critical to the operation and maintenance of the collection system. The maps are used when maintenance crews respond to sewer problem calls, and by engineers designing capital projects. This project will update the City's GIS with information from new capital projects, inspection and maintenance data.

SCVWD Sewer Main

The Santa Clara Valley Water District (SCVWD) will remove and replace the Hale Creek box culvert at Mountain View as part of the Permanente Creek Flood Protection Project -- Channel Improvements in the summer of 2017. The City has an existing 6" sanitary sewer main under the box culvert in a 15"

casing that needs to be replaced as recommended by the Sanitary Sewer Master Plan.

Sanitary Sewer Video Inspection

As sewer system networks age, the risk of deterioration, blockages, and collapses becomes a major concern. Cleaning and inspecting sewer lines are essential to maintaining a properly functioning system; these activities further a community's reinvestment into its wastewater infrastructure.

Inspection programs are required to determine current sewer conditions and to aid in planning a maintenance strategy. Video inspections are the most frequently used, most cost efficient, and most effective method to inspect the internal condition of a sewer.

The 2013 Sanitary Sewer Master Plan Update recommends full video inspection of the sanitary sewer system every 5 years. Current video inspection data was last collected between 2002 and 2010.

APPENDIX A: Glossary of Terms

Accrual Basis of Accounting

The method of accounting under which transactions are recognized when they occur regardless of the timing of related cash flows.

ADA

Americans with Disabilities Act

Administrative Charge

A transfer of monies to the General Fund to reimburse the General Fund for work performed in other funds by an employee whose salary is budgeted in the General Fund.

Appropriation

An authorization made by the City Council that permits City departments to make expenditures of governmental resources. All appropriations that have not been expended or lawfully encumbered return to the original fund. The City Council may increase or decrease appropriations by majority vote. The City Manager may transfer appropriations within a department. All increases or transfers between funds or specific capital projects must be approved by the City Council.

Appropriations Limit

As a governmental entity in the State of California, the City is subject to the Gann Spending Limit Initiative, which limits the amount of annual appropriations of tax proceeds. See City Financial Information to review the calculation.

AQMD

Air Quality Management District

Assessed Valuation

The dollar value assigned to real estate or other property, by Santa Clara County for the purpose of levying property taxes.

Asset

Resources owned or held that have an economic value.

Balanced Budget

A budget in which income (revenue) is equal to or greater than expenditures.

Beginning Fund Balance

The balance of a fund including restricted, assigned, committed and unassigned values carrying over into the following year.

Bond

A written promise to pay a designated amount (called the principal) at a specific date in the future, together with periodic interest at a specified rate. In the Financial Plan, these payments are identified as debt service. Bonds are usually used to obtain long-term financing for capital improvements.

Bond Rating

An opinion of a credit rating agency as to a debt issuer's overall financial capacity to meet its financial commitments as they come due. It is a measure of risk associated with a debt issuer's ability to pay its debt.

Budget - Operating

A fiscal plan detailing current operating programs, including an estimate of adopted expenditures and the means to finance them.

CARB

California Air Resources Board

CalPERS

California Public Employees' Retirement System

CalTrans

California Department of Transportation

Capital Improvement (Capital Project)

Refers to a specific project in the CIP. The City budgets at the project level. Capital projects are major projects (water lines, streets, parks, buildings, etc.) having a long-term nature/life, constructed or acquired for the public good.

Capital Improvement Program (CIP)

A five-year fiscal plan detailing the amount and timing of anticipated capital expenditures. Council adopts the first year of the CIP and approves the entire five-year plan in concept. It is updated annually with the adoption of the budget.

Capital Outlay

These expenditures result in the acquisition of, or addition of, capital assets or infrastructure. They may occur in an operating program (e.g., the purchase of computers) or a capital project (e.g., land acquisition). Conversely, a capital project may have other categories of expense (e.g., labor costs for administrative personnel working on the project or other operating costs for materials and/or supplies that are not capital items).

Capital Projects Funds

established to account for resources used for the acquisition and construction of capital facilities by the City, except those financed by proprietary funds. The individual funds comprising this grouping include the Capital Projects Fund, Real Property Proceeds Fund, and the Community Facilities Renewal Fund and other dedicated special revenue funds. These and other funds (including Special Revenue, Enterprise and General Fund) comprise the funding sources for the CIP.

Cash Basis of Accounting

A basis of accounting under which revenue and expenses are recognized when cash is received and cash is paid.

Community Development Block Grant (CDBG)

A federally funded program, the main objective of which is the development of viable urban communities through the provision of decent housing, a suitable living environment and economic opportunity, principally for low to moderate income persons.

Comprehensive Annual Financial Report (CAFR)

The audited annual financial report of a government, which encompasses all funds.

Consumer Price Index (CPI)

An index that tracks the prices of a specified set of goods and services purchased by consumers, providing a measure of inflation (often considered a cost-of-living index).

Cost Recovery

The extent to which costs are attributed directly to a service or program, as well as a reasonable share of indirect costs related to the service or program, that are recovered through charges for fees, charges or other revenues.

Debt Service

The repayment of principal and/or interest on borrowed funds.

Debt Service Funds

Governmental fund type used to account for the accumulation of resources for, and the payment of, general long- term debt principal and interest.

Department

A major administrative unit of the City, which indicates overall management responsibility for an operation or a group of related operations within a functional area, and the organizational level at which the budget is adopted and controlled.

Depreciation

A non-cash expense representing the systemic and rational allocation of the cost of a capital asset over its useful life.

Division

An organizational unit that indicates management responsibility for an operation or group of related operations within a functional area, subordinate to the department level of the organization.

Encumbrance

Commitment related to unperformed contracts for goods or services.

Enterprise Funds

Funds established to account for the operations and financing of self-supporting activities of a governmental unit that renders services on a user charge basis to the general public, similar to private business enterprises. The following funds operate the Wastewater Fund on an enterprise basis.

Expenditure

The payment of cash on the transfer of property or services for the purpose of acquiring an asset, service or settling a loss.

Expense

Charges incurred (whether paid immediately or accrued) for operations, maintenance, interest or other charges.

Fiscal Year (FY)

The fiscal year for the City begins on July 1 of each year and ends on June 30 of the following year. It is designated by the calendar year in which it ends.

FTE (Full-Time Equivalent)

The equivalent of a full-time position for one year, based on 1.0 FTE equaling 2,080 hours.

Function

An operational grouping of related departments.

Fund

An independent fiscal and accounting entity with a self-balancing set of accounts.

Fund Balance Classifications

Fund balance is defined as the difference between assets and liabilities. Beginning in FY 2010/11, the City is required to reclassify fund balances into the following five categories to comply with the Governmental Accounting Standards Board Statement (GASB) No. 54, Fund Balance and Governmental Fund Types.

Nonspendable

This is a portion of fund balance not available for appropriations by its nature or external restriction. Examples are inventories and donations that require intact principal values.

• Spendable

Restricted: The restricted portion of fund balance is subject to externally enforceable legal restrictions. Examples are Gas Tax revenues and grant proceeds.

Committed

The committed portion of fund balance is constrained by the limitations imposed through formal City Council action. Only formal City Council action can remove or modify a previously committed amount.

Assigned

The Assigned portion of fund balance is established for intended use by either the City Council or its designee, such as the City Manager. No formal City Council action is needed to remove the intended use. GAAP required reserves, such as the Other Post-Employment Benefits (OPEB) reserve, belong to this category. The Fiscal Policy and State Revenue Stabilization policy balances belong to this category.

Unassigned

The Unassigned portion of fund balance is that remaining after the non-spendable, the restricted, the committed, and the assigned fund balances are identified and recorded.

General Fund

This fund is one of five governmental fund types and typically serves as the chief operating fund of a government. The General Fund is used to account for all financial resources except those required to be accounted for in another fund.

Generally Accepted Accounting Principles (GAAP)

The conventions, rules, and procedures that serve as the norm for the fair presentation of financial statements.

General Obligation Bonds

Bonds that are issued and secured by either the full faith and credit of the issuing government or by a promise to levy property taxes in an unlimited amount, as necessary to pay debt service, or both. General obligation bonds of local agencies are typically only payable from ad valorem property taxes.

Geographic Information System (GIS)

A computer system capable of integrating, storing, editing, analyzing, sharing, and displaying geographically-referenced information.

GFOA

Government Finance Officers Association

Governmental Funds

Funds generally used to account for tax-supported activities. There are five different types of governmental funds. Los Altos' governmental funds include the General Fund, Other General Purpose funds, Special Revenue funds, Debt Service funds and Capital Projects funds.

Grant

A contribution by a government or other organization to support a particular function. Grants may be classified as either operational or capital, depending on the grant.

Indirect Cost

A cost necessary for the functioning of the organization as a whole, but which cannot be directly assigned to one service.

Infrastructure

The physical assets of a government (e.g., streets, sewers, public buildings and parks).

Internal Service Funds

Used to account for the financing of centralized services to different funds and City departments on a cost reimbursement basis (including replacement costs). Internal Service funds of the City include Workers' Compensation, Liability and Dental Insurance.

Modified Accrual Basis of Accounting

The basis of accounting, according to which (a) revenues are recognized in the accounting period in which they become available and measurable and (b) expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable.

Objective

A specific, measurable goal, formally established at the division level of the organization.

Personnel Services

A budget category used to capture the costs associated with employing full-time and part-time employees.

Proprietary Fund

Funds that focus on the determination of operating income, changes in net assets (or cost recovery), financial position, and cash flows. There are two different types of proprietary funds: Enterprise funds and Internal Service funds.

Operating Expenditure

Personnel, materials and services, and capital outlay expenses required for a department to function.

Operating Reserves

Unrestricted funds, usually accumulated over several years, that are available for appropriation (also see Unreserved Fund Balance).

Operating Revenues

Funds the government receives as income to pay for ongoing operations, such as taxes, fees from specific services, interest earnings, and grant revenues.

Pay-As-You-Go Basis

A term used to describe a financial policy by which capital outlays are financed from current revenues rather than through borrowing.

Revenue

Sources of income financing the operations of government.

RFP

Request for Proposal

Special Revenue Funds

Used to account for the revenue derived from specific taxes or other earmarked revenue sources (other than for major capital projects) that are restricted by law or administrative action for expenditures to be used for specific purposes.

Structural Deficit

A fiscal imbalance created when ongoing expenditures exceed ongoing revenues.

Structural Reductions

Measures that either decrease or eliminate ongoing costs or generate new, ongoing revenues.

Transient Occupancy Tax (TOT)

A tax on hotel, motel and timeshare stays of less than 30 days. The rate is currently 11%.

Triple Flip

This budget measure has officially expired. In March 2004, California voters approved the Governor's budget measure which called for (among other things) the implementation of the "Triple Flip" to generate a dedicated revenue stream for bond repayment. One-quarter of sales tax revenues were re-directed by the State and replaced with an equal amount of property tax revenues. Because the basis for the calculation of this replacement revenue continued to be the amount of taxable sales generated, the City recorded this replacement revenue in the sales tax category.

User Charges

The payment of a fee for direct receipt of a public service by the party who benefits from the service.

Unreserved Fund Balance (also known as unrestricted fund balance)

The portion of a fund's balance that is not restricted for a specific purpose and is available for general appropriation.

APPENDIX B: Budget Resolutions

Pending Council Budget Adoption June 27th, 2017

APPENDIX C: We are Los Altos
