

Archer 1200 Barrier™

An unanchored “drop-and-stop” barrier for rapid deployment on roadways and hard surfaces.

Meridian’s ultimate rapidly deployable Archer 1200 Barrier™ can augment fixed-in-place HVM (Hostile Vehicle Mitigation) barriers or be utilized as a primary security system for entry points, roadways and perimeters.

Manufactured of high strength, ballistic rated steel, the Archer 1200 Barrier™ is easily installed by one person without the use of cranes or heavy equipment. Simply off-load and place the barriers for almost instant protection—no anchors or assembly are required.

The Archer 1200 Barrier™ is an ideal application for:

- areas of mass gatherings
- college and university campuses
- stadiums and sports arenas
- police and fire departments
- military bases and National Guard facilities
- energy and chemical plants
- airports, seaports and transportation centers
- financial centers

Archer Barriers provide a new option for security and protect an organization’s investment in its people, facilities and assets.

Archer 1200 Barrier™ United States Letters Patent No. 8,215,866

Contact Meridian at **(323) 282-7836** or visit our website at **BetterBarriers.com** to schedule a web presentation or to find out how the Archer rapidly deployable barrier systems provide a new level of security.

The Archer Barrier Systems include the following features:

- Unanchored, rapid deployment on roadways and hard surfaces
- One person portable
- Fabricated of high strength steel
- Non-electronic, non-hydraulic design reduces training and maintenance costs
- Modular design enables flexible configuration
- Non-lethal vehicle control solution

Measurements

2' wide, 4' deep, 36" high (per barrier)
