

DATE: December 11, 2017

AGENDA ITEM # 3

TO: Environmental Commission

FROM: J. Logan, Staff Liaison

SUBJECT: Receive report on Silicon Valley Clean Energy Authority

BACKGROUND

State and Local Mandates

State Assembly Bill 32, the Global Warming Solutions Act, was signed into law in 2006 and directed public agencies in California to support the state-wide target of reducing greenhouse gas (GHG) emissions to 1990 levels by 2020. In addition, California adopted ambitious energy and environmental policies to reduce state-wide greenhouse gas (GHG) emissions to 40% of 1990 levels by 2030 and, to provide 33% of electricity demands in 2020 from renewable resources utilizing clean energy technologies and environmental benefits.

To address the reduction of GHG emissions at the local level, the City Council adopted a Los Altos Climate Action Plan (CAP) on December 10, 2013. The CAP is a comprehensive strategy with goals and measurements to reduce GHG emissions within five focus areas: Transportation, Energy, Resource Conservation, Green Community and Municipal Operations. The CAP was adopted with a target of reducing the community's GHG emissions by at least 15% by 2020 and with an overarching plan for how the City can achieve up to a stretch-goal of 17% reduction in the GHG emissions by 2020.

Community Choice Energy

One method that has the potential to reduce the GHG emission associated with energy consumption is the establishment of Community Choice Energy (CCE), a system that allows cities, counties and Joint Power Authorities (JPA) to aggregate the purchasing power of an identified customer base within a defined area to secure alternative energy supply contracts with the goal of increasing the percentage of energy from renewable sources. The purchase of alternative energy supplies includes renewable sources such as hydroelectric, wind and geothermal as opposed to non-renewable fossil fuels such as coal, oil and natural gas. The consequences inherent in the use of fossil fuels to generate energy are particularly high carbon dioxide equivalents or GHG emissions which contribute to global warming. The ability to form CCEs has been adopted into law in California and a few other states.

Council Actions

City Council convened a study session on Community Choice Aggregation (Energy) on March 10, 2015. The full staff report and video of the Council CCE study session is posted on the City Website at http://los-altos.granicus.com/GeneratedAgendaViewer.php?view_id=4&clip_id=911

On April 3, 2015, the City of Sunnyvale sent invitations to Santa Clara County cities to participate in the South Bay Technical Feasibility Study currently composed of and partnered by the Cities of Sunnyvale, Mountain View, Cupertino and Unincorporated Santa Clara County. This partnership is investigating the feasibility of a Community Choice Energy program for the South Bay.

On January 26, 2016, the Environmental Commission presented its Final CCE Report to Council. Council expressed appreciation to the Commission and directed staff to move forward with the necessary steps for membership in Silicon Valley Clean Energy Authority (SVCEA) and the establishment of a CCA program for Los Altos at its February 9, 2016 meeting. At its February 9 and February 23, 2016 meetings, Council finalized the steps for membership in SVCEA and establishment of a CCA for the City. Mayor Bruins was appointed as the SVCEA regular member of the Board of Directors and Councilmember Mordo as the alternate member.

SVCEA held its initial Board of Directors' meeting at the Santa Clara Board of Supervisors chambers on April 13, 2016. The agenda packet and video of the monthly proceedings are available at http://www.svcleanenergy.org/app_pages/view/297.

Implementation of SVCEA in the Los Altos Community

The Environmental Commission will review SVCEA monthly agendas, materials and meeting summary notes for purposes of discussion at its Environmental Commission meetings. The results of Commission discussions and recommendations will be provided to Director Bruins. This is in accordance with the Work Plan project to provide resources to Director Bruins on policy and programs guidance. In the event the subcommittee needs to convene for items pertaining to SVCEA, the meeting will be agendaized to the public and will comply with requirements of the Brown Act.

At its November 2016 meeting, Commissioners discussed the GreenPrime opt-up electricity choice for municipal operations and the default GreenStart mix. Estimated cost information for both energy choices were discussed. By consensus, the Commission recommended Council to approve the opt-up GreenPrime choice for municipal operations.

At its January 10, 2017 meeting, Council approved to opt up to the purchase of GreenPrime electricity service for municipal operations. In addition, Council approved a Subordination Agreement required by SVCEA for purposes of banking and finance procedures.

Delivery of GreenPrime electricity service to City municipal operations commenced in April. Residential SVEA service also commenced in April followed by a second phase-in of remaining customers in July 2017. SVCE staff held an informational community meeting on June 21, 2017 at Hillview Community Center, and hosted tables at the Farmers' Market and at the Art & Wine event.

SVCEA Structure

Throughout the summer and fall 2017, meetings of the SVCEA Sustainability Managers' Roundtable, SVCEA staff and managers presented 14 programs focused on reducing Greenhouse Gas Emissions. The Board of Directors meeting included a closed session to discuss the appointment of a new Chief Executive Officer.

In addition to conducting a search for a new Chief Executive Officer, the Board directed staff to compose a proposal focused on the creation of a consumer advisory board to source additional community feedback. The advisory board will consist of representatives from all 12 of the communities within the SVCE service area and will include commercial and residential consumers. City staff will continue to attend the SVCEA Sustainability Managers' Roundtable to represent the

City's interest and will report monthly at the Environmental Commission meetings. Staff will also will continue to update and get input from SVCEA Director Bruins.

DISCUSSION

At the September 28, 2017 SVCEA Sustainability Managers Roundtable, SVCEA staff stating it was combining the PIOs and Sustainability Managers into a single group, now termed the Member Agency Working Group (MAWG). SVCEA staff will continue to work with MAWG to source input and gather community information through various workshops and focus groups and will provide a formal accounting of MAWG meetings to the SVCEA Board of Directors.

At the October 26, 2017 meeting, SVCEA updated the MAWG on its recent activity, including the anticipated addition of the City of Milpitas to the SVCE territory. SVCE expects Milpitas to join the service area May 1, 2018. Milpitas will add 25,000 accounts and about 18% to the energy load. Gilee Corral from the City of Cupertino Office of Sustainability gave a presentation about a Community-Based Social Marketing research project they are conducting that explores how to address behaviors related to electrification. Finally, SVCEA staff provided an example of how they plan to apply established program criteria and metrics to new programs. The November 8, 2018 SVCEA Board of Directors meeting has been rescheduled to November 29, 2017.

At the November 30, 2017 MAWG meeting, SVCEA staff reported that the City of Milpitas adopted a resolution effectively electing to join the SVCE territory in May 2018. Applications for the Customer Program Advisory Group closed November 17, 2017. SVCE received and is reviewing 32 applications for the 15-member group which will meet monthly. Elaine Marshall, City of Sunnyvale, presented on Sunnyvale Climate Action Plan (CAP) 2.0, an update to the 2014 CAP. SVCEA staff also updated staff on analysis of program measurement criteria for voluntary incentives and the potential establishment of a model ordinance for mandatory measures that exceed California Title 24 minimum standards (Reach Codes). SVCEA staff will invite a Reach Code consultant to the next SVCEA MAWG meeting to further discuss the process of establishing a model ordinance and possible next steps. There will be no scheduled MAWG meeting in December; the group will reconvene in January.

SVCEA Estimated/Anticipated SVCE Emission Factor

After the SVCEA Board of Directors special meeting on 10/24, it was determined that there is a small amount of non-biogenic CO_{2e} associated with the renewable biomass-based energy sources in the forecasted SVCE supply portfolio. Based upon preliminary calculations, SVCEA will maintain its carbon free message, but have removed the 100%. Also, SVCEA is currently evaluating how it might join and/or utilize a voluntary carbon reporting methodology supported by The Climate Registry (TCR) for establishing 2017 emissions factor.
