Los Altos SR2S Program

The City of Los Altos is working on two coordinated SR2S projects:

SR2S Education & Encouragement Program (this one!)

The SR2S EE program focuses on identifying opportunities to create education and encouragement activities both inside and outside of the classroom, including possible community-based activities led by the City.

Complete Streets Master Plan

SR2S is one of three project elements of the Complete Streets Master Plan. This effort is focused on identifying potential infrastructure improvements and suggested walking and biking routes around each school campus.

Los Altos SR2S Today

- What challenges or barriers prevent students from walking or biking to school more often?

Looking Ahead

- What types of SR2S education and encouragement activities would you like to see happening for middle and high school students in Los Altos?
- How can the City better communicate and engage with middle and high school students around SR2S?

Wrapping Up

- What do you see as the top SR2S program priorities?

- Is there anything else you would like to share?

Thank you!
